Non-GAAP Financial Measures

In addition to reporting financial information in accordance with U.S. GAAP, the Company provides certain non-GAAP financial measures that are not in accordance with, or alternatives for, GAAP. In addition to the comparable GAAP measures, MGP has disclosed adjusted gross profit, adjusted operating income, adjusted income before taxes, adjusted net income, adjusted MGP earnings, adjusted EBITDA and basic and diluted adjusted earnings per share. The presentation of non-GAAP financial measures should be reviewed in conjunction with gross profit, operating income, income before taxes, net income, net income attributable to common shareholders and basic and diluted earnings per share computed in accordance with U.S. GAAP and should not be considered a substitute for these GAAP measures. The non-GAAP adjustments referenced in the section entitled "Reconciliation of Selected GAAP Measures to Non-GAAP Measures," take into account the impacts of items that are not necessarily ongoing in nature and/or predictive of the Company's operating trends. We believe that these non-GAAP measures provide useful information to investors regarding the Company's performance and overall results of operations. In addition, management uses these non-GAAP measures in conjunction with GAAP measures when evaluating the Company's operating results compared to prior periods on a consistent basis, assessing financial trends and for forecasting purposes. Non-GAAP financial measures may not provide information that is directly comparable to other companies, even if similar terms are used to identify such measures.
