San Francisco Giants Select AMD as Multi-Year Technology Partner

AMD Technology Deployments Underway as Team Leans on APU-Based Touchscreen Solutions for Final All-Star Voting Push

SUNNYVALE, CA -- (Marketwire) -- 06/26/12 -- AMD (NYSE: AMD) today announced that Major League Baseball's (MLB) San Francisco Giants selected AMD as a technology partner. The Giants have recently installed 66 new AMD A-Series Accelerated Processing Unit (APU)-based HP TouchSmart 320m All-In-One (AIO) touchscreen systems at AT&T Park, which will be followed by deployments of other AMD-powered systems throughout the organization.

"Our technology partnership with the San Francisco Giants puts AMD in a great position to showcase the role AMD technology can play to help large organizations harness the trends around consumerization, the Cloud and convergence to drive their business," said Lisa Su, senior vice president and general manager, AMD Global Business Units. "From powering the front office infrastructure to the luxury suite experience at AT&T Park, AMD is ready to be a technology clean-up hitter for the Giants and their fans."

The Giants are presently using AMD technology to empower fans at AT&T Park to vote their favorite players into the National League's starting line-up for the upcoming MLB All-Star game on July 10. AIO desktops with touchscreens in all of the ballpark suites will be linked to the online MLB All-Star ballot allowing fans to quickly vote for their favorite Giants players.

"We are excited to have AMD power the technology behind the team," said Bill Schlough, chief information officer, San Francisco Giants. "Much like the Giants, AMD is committed to innovation. We believe AMD technology will position the Giants to build upon our winning on the field while continuing to deliver the ultimate fan experience at AT&T Park."

In addition to the AIO desktops in the luxury suites, the Giants front office will standardize on AMD-based desktops and notebooks over the course of the three-year agreement. The Giants also plan to install AMD Opteron™-based servers in their data centers where appropriate.

About AMD

AMD (NYSE: AMD) is a semiconductor design innovator leading the next era of vivid digital experiences with its ground-breaking AMD Accelerated Processing Units (APUs) that power a wide range of computing devices. AMD's server computing products are focused on driving industry-leading cloud computing and virtualization environments. AMD's superior graphics technologies are found in a variety of solutions ranging from game consoles, PCs to supercomputers. For more information, visit http://www.amd.com.

CAUTIONARY STATEMENT
This press release contain forward-looking statements, concerning among other things, technology planned partner purchases and deployments of AMD hardware, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are commonly identified by words such as "would," "may," "expects," "believes," "plans," "intends," "projects," and other terms with similar meaning. Investors are cautioned that the forward-looking statements in this release are based on current beliefs, assumptions and expectations, speak only as of the date of this release and involve risks and uncertainties that could cause actual results to differ materially from current expectations. Because our actual results may differ materially from our plans and expectations today, we encourage you to review in detail the risks and uncertainties in our filings with the Securities and Exchange Commission, including but not limited to the Quarterly Report on Form 10-Q for the quarter ended March 31, 2012.
