Fourth Quarter 2022 Outlook

For the fourth quarter of 2022, the company is projecting total revenue to decrease between 3% and 5% from fourth quarter 2021 total revenue of \$69.1 million. This decrease is due largely to the fact that Regnery had an extremely strong fourth quarter in book sales last year. The company is also projecting operating expenses before gains or losses on the sale or disposal of assets, stock-based compensation expense, legal settlement, changes in the estimated fair value of contingent earn-out consideration, impairments, depreciation expense and amortization expense ("Recurring Operating Expenses") to increase between 4% and 7% compared to the fourth quarter of 2021 Recurring Operating Expenses of \$58.3 million.

A reconciliation of Recurring Operating Expenses to the most directly comparable GAAP measure is not available without unreasonable efforts on a forward-looking basis due to the potential high variability, complexity and low visibility with respect to the charges excluded from this non-GAAP financial measure, in particular, the change in the estimated fair value of earn-out consideration, impairments and gains or losses from the disposition of fixed assets. The company expects the variability of the above charges may have a significant, and potentially unpredictable, impact on its future GAAP financial results.

Forward-Looking Statements

Statements used in this press release that relate to future plans, events, financial results, prospects or performance are forward-looking statements as defined under the Private Securities Litigation Reform Act of 1995. Actual results may differ materially from those anticipated as a result of certain risks and uncertainties, including but not limited to the ability of Salem to close and integrate announced transactions, market acceptance of Salem's radio station formats, competition from new technologies, inflation and other adverse economic conditions, and other risks and uncertainties detailed from time to time in Salem's reports on Forms 10-K, 10-Q, 8-K and other filings filed with or furnished to the Securities and Exchange Commission. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Salem undertakes no obligation to update or revise any forward-looking statements to reflect new information, changed circumstances or unanticipated events.

(1) Regulation G

Management uses certain non-GAAP financial measures defined below in communications with investors, analysts, rating agencies, banks and others to assist such parties in understanding the impact of various items on its financial statements. The company uses these non-GAAP financial measures to evaluate financial results, develop budgets, manage expenditures and as a measure of performance under compensation programs.

The company's presentation of these non-GAAP financial measures should not be considered as a substitute for or superior to the most directly comparable financial measures as reported in accordance with GAAP.

Regulation G defines and prescribes the conditions under which certain non-GAAP financial information may be presented in this earnings release. The company closely monitors EBITDA, Adjusted EBITDA, Station Operating Income ("SOI"), Same Station net broadcast revenue, Same Station broadcast operating expenses, Same Station Operating Income, Digital Media Operating Income, Publishing Operating Income (Loss), and operating expenses excluding gains or losses on the disposition of assets, stock-based compensation, changes in the estimated fair value of contingent earn-out consideration, impairments, depreciation and amortization, all of which are non-GAAP financial measures. The company believes that these non-GAAP financial measures provide useful information about its core operating results, and thus, are appropriate to enhance the overall understanding of its financial performance. These non-GAAP financial measures are intended to provide management and investors a more complete understanding of its underlying operational results, trends and performance.

The company defines Station Operating Income ("SOI") as net broadcast revenue minus broadcast operating expenses. The company defines Digital Media Operating Income as net Digital Media Revenue minus Digital Media Operating Expenses. The company defines Publishing Operating Income (Loss) as net Publishing Revenue minus Publishing Operating Expenses. The company defines EBITDA as net income before interest, taxes, depreciation, and amortization. The company defines Adjusted EBITDA as EBITDA before gains or losses on the disposition of assets, before debt modification costs, before changes in the estimated fair value of contingent earn-out consideration,

before impairments, before net miscellaneous income and expenses, before (gain) loss on early retirement of long-term debt and before non-cash compensation expense. SOI, Digital Media Operating Income, Publishing Operating Income (Loss), EBITDA and Adjusted EBITDA are commonly used by the broadcast and media industry as important measures of performance and are used by investors and analysts who report on the industry to provide meaningful comparisons between broadcasters. SOI, Digital Media Operating Income, Publishing Operating Income (Loss), EBITDA and Adjusted EBITDA are not measures of liquidity or of performance in accordance with GAAP and should be viewed as a supplement to and not a substitute for or superior to its results of operations and financial condition presented in accordance with GAAP. The company's definitions of SOI, Digital Media Operating Income, Publishing Operating Income (Loss), EBITDA and Adjusted EBITDA are not necessarily comparable to similarly titled measures reported by other companies.

The company defines Same Station net broadcast revenue as broadcast revenue from its radio stations and networks that the company owns or operates in the same format on the first and last day of each quarter, as well as the corresponding quarter of the prior year. The company defines Same Station broadcast operating expenses as broadcast operating expenses from its radio stations and networks that the company owns or operates in the same format on the first and last day of each quarter, as well as the corresponding quarter of the prior year. The company defines Same Station SOI as Same Station net broadcast revenue less Same Station broadcast operating expenses. Same Station operating results include those stations that the company owns or operates in the same format on the first and last day of each quarter, as well as the corresponding quarter of the prior year. Same Station operating results for a full calendar year are calculated as the sum of the Same Station-results for each of the four quarters of that year. The company uses Same Station operating results, a non-GAAP financial measure, both in presenting its results to stockholders and the investment community, and in its internal evaluations and management of the business. The company believes that Same Station operating results provide a meaningful comparison of period over period performance of its core broadcast operations as this measure excludes the impact of new stations, the impact of stations the company no longer owns or operates, and the impact of stations operating under a new programming format. The company's presentation of Same Station operating results are not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. The company's definition of Same Station operating results is not necessarily comparable to similarly titled measures reported by other companies.

For all non-GAAP financial measures, investors should consider the limitations associated with these metrics, including the potential lack of comparability of these measures from one company to another.

The Supplemental Information tables that follow the condensed consolidated financial statements provide reconciliations of the non-GAAP financial measures that the company uses in this earnings release to the most directly comparable measures calculated in accordance with GAAP. The company uses non-GAAP financial measures to evaluate financial performance, develop budgets, manage expenditures, and determine employee compensation. The company's presentation of this additional

information is not to be considered as a substitute for or superior to the directly comparable measures as reported in accordance with GAAP.
