Dallas Water Utilities and Ameresco to Provide Tour of Biogas Facility; the New Energy Recovery Facility Will Save Money and Reduce Emissions

Ameresco, Inc. (NYSE:AMRC)

What:

Dallas Water Utilities' (DWU) staff members and Ameresco management will provide a tour of the City's new 4.3 MW biogas capture and refining facility, which generates electricity and thermal load to power DWU's facilities. The tour will include a look at the Digester Complex to show how methane is generated, followed by the Cogeneration Facility to demonstrate how methane is converted into electricity.

The energy recovery facility is expected to offset approximately 60 percent of the electricity that the DWU currently pulls from the grid. This is expected to save the City approximately \$1.5 million dollars annually. Ameresco was chosen by Dallas to design, build and operate the plant, which is expected to reduce carbon dioxide emissions by 19,150 metric tons annually.

Who:

- Cesar Baptista, Assistant Director, Capital Improvements Program
- Chris Kaakaty, Assistant Director, Wastewater Operations
- Richard Wagner, Senior Program Manager, Wastewater Facilities Project Management
- Jesse White, Senior Program Manager, Southside Wastewater Treatment Plant
- Mark Evers, Operations Manager, Southside Wastewater Treatment Plant
- Tom Foster, Solids Supervisor, Southside Wastewater Treatment Plant
- James Bier, Senior Project Developer, Ameresco
- Robert Bell, Senior Project Manager, Ameresco
- Jacob Quarles, Cogeneration Facility Operator, Ameresco

When: 10 a.m. Tuesday, April 19

Where: City of Dallas Water Utilities, 10011 Log Cabin Road
