Tecogen Announces National Tour Featuring Ultra Low Emissions Energy Solutions

WALTHAM, Mass., Oct. 17, 2013 /PRNewswire/ -- Tecogen Inc., hit the road this week on a national educational and marketing tour featuring its *Ultra*-low emissions cogeneration, chiller and heat pump systems. During the next two months, the show will be visiting with distributors, energy centers, engineering firms, end users and investors. Attendees are invited to learn about Tecogen opportunities, technology and meet with the staff and leadership of the company.

(Logo: <https://photos.prnewswire.com/prnh/20130409/NE91281LOGO>)

The centerpiece of the roadshow is a fifty-three foot fully enclosed mobile marketing exhibit trailer displaying Tecogen's flagship cogeneration system, the InVerde, and their natural gas engine driven chiller, the Tecochill. The systems onboard are equipped with Tecogen's innovative patented *Ultra*-emissions system which virtually eliminates criteria pollutants (contributors to smog). With emissions on par with those from fuel cells, systems with the Tecogen *Ultra* low emissions meet the most stringent air quality standards including those in Southern California. The trailer comes with full exhibition capabilities including a slide-out section expanding the meeting space to accommodate large crowds for presentations on integrated LED monitors running automated and customizable presentations.

"Tecogen systems are a commercially available clean energy solution that directly addresses national priorities including increasing energy efficiency, reducing emissions, and improving energy security," said Robert Panora, President and COO of Tecogen. "Tecogen technology is founded on practical, economical and innovative solutions that meet the needs of a broad base of consumers. With best in class emissions, efficiency, versatility, return on investment and product longevity, Tecogen products provide better solutions for today's energy concerns."

Events include stops in Boston, New York City, Chicago, Philadelphia and San Francisco. All events are open to visitors. To see the full roadshow schedule of events, please visit <http://www.tecogen.com/about-us-news-and-events-upcoming-events.htm>

About Tecogen

Tecogen manufactures, installs and maintains highly efficient, *Ultra*-clean Combined Heat and Power products including natural gas engine-driven cogeneration, air conditioning systems, and high-efficiency water heaters for industrial and commercial use. Tecogen has shipped more than 2,000 units, supported by an established network of engineering, sales, and service personnel across the United States. For more information, please visit
