FTSE Russell, a British index provider, makes available a comprehensive range of reliable and accurate indexes used by investors to measure and analyze global markets across asset classes, styles or strategies. The Russell U.S. Indexes have been widely accepted by institutional investors for their academic integrity and investor usability. Russell U.S. Indexes are part of FTSE Russell, a leading global index provider. FTSE Russell determines membership for its Russell U.S. Indexes primarily by objective, market-capitalization rankings and style attributes.

Membership in the Russell 3000[®] Index means automatic inclusion in the large-cap Russell 1000[®] Index or small-cap Russell 2000[®] Index, and also includes the appropriate growth and value style indexes. For more information on the Russell Indexes go to the "Russell Reconstitution" section on the [FTSE Russell website](#).

"We are thrilled to be included among the companies that comprise the Russell Indexes," said Lori Bisson, Soliton's Chief Financial Officer. "As the FTSE Russell seeks to benchmark the entire U.S. stockmarket, our inclusion in these indexes within just five months of our IPO is gratifying and a validation of the potential we believe investors see in Soliton's future."

About Soliton, Inc.

Soliton, Inc. is a medical device company with a novel and proprietary platform technology licensed from MD Anderson. The Company's first FDA cleared commercial product will use rapid pulses of acoustic shockwaves as an accessory to lasers for the removal of unwanted tattoos. The Company is based in Houston, Texas, and is actively engaged in bringing the Rapid Acoustic Pulse ("RAP") device to the market. The Company believes this "Soliton" method has the potential to lower tattoo removal costs for patients, while increasing profitability to practitioners, compared to current laser removal methods. Soliton is investigating potential additional capabilities of the RAP technology in preclinical testing, including the potential to assist existing fat reduction technology in the reduction of fat as well as improving the appearance of cellulite by creating mechanical stress at the cellular

level and inducing significant collagen growth.
