SCWorx Announces New Agreement with Healthcare System

New Customer Expands SCWorx's Healthcare Data Management Footprint

MIDDLETON, MA, Oct. 19, 2026 (GLOBE NEWSWIRE) -- SCWorx Corp. ("SCWorx" or the "Company"), a provider of healthcare supply chain data management solutions, today announced that it has entered into a new agreement with an independent, community-owned healthcare system serving the New Mexico, Arizona, Colorado and Utah.

Under the agreement, SCWorx will provide its healthcare supply chain data management services to support the health system's efforts to improve the accuracy, completeness and usability of its healthcare product data.

"We are pleased to add another healthcare provider to the SCWorx customer base," said Tim Hannibal, President and Chief Executive Officer of SCWorx. "Healthcare organizations increasingly recognize that accurate and enriched product data is foundational to efficient supply chain operations, financial processes and clinical workflows. We believe this new relationship further demonstrates the value of our solutions and our ability to help healthcare organizations improve the quality and usability of their enterprise data."

SCWorx combines healthcare-specific technology, proprietary data enrichment processes and domain expertise to help hospitals address incomplete, inconsistent and inaccurate item master data. The Company's solutions provide enriched product attributes and standardized information that can be used across supply chain, finance, clinical and enterprise resource planning applications.

The new agreement expands SCWorx's healthcare provider customer base and supports the Company's strategy of growing recurring revenue through new customer relationships while helping healthcare organizations establish more accurate, standardized and actionable supply chain data.

About SCWorx

SCWorx Corp. provides healthcare data management solutions designed to improve the accuracy and utility of information used throughout healthcare organizations. SCWorx's technology and services help healthcare providers cleanse, normalize, enrich and maintain supply chain data used across enterprise applications and operational workflows.
