## Q1 Highlights

Launched 150<sup>th</sup> Satellite

Including launching:

## Key Customer Wins

Agreement with **NorthStar** for a new space-as-a-service agreement to build a constellation of satellites focused on space-situational awareness and debris monitoring.

A top **Formula 1** racing team gains insights from our weather data that make them more competitive come race day.

Expansion of an existing partnership with **Slingshot Aerospace** in which we will provide GPS telemetry data that will help with identifying and mitigating ground-based radio-frequency and GPS interferences.

Weather data provided to **Zeus Agrotech** in Brazil allows them to better process and analyze agro-climatological and water data, in turn, helping its customers to make better decisions in their agricultural activities.

As the world continues to deal with supply chain challenges, we're providing data to insight and intelligence companies, such as **Freightwaves** in Tennessee, to help them optimize data for the cargo industry.
