NeoGenomics to Present New Data at AMP 2024, Highlighting the Impact of ctDNA and NGS for Advancing Cancer Diagnostics and Personalized Treatment

FT. MYERS, Fla.--(BUSINESS WIRE)-- **NeoGenomics, Inc. (NASDAQ: NEO)**, a leading oncology testing services company, will present four abstracts at the Association for Molecular Pathology (AMP) 2024 Annual Meeting & Expo in Vancouver, Canada, November 19-23 (booth #830). The research demonstrates how ctDNA and next-generation sequencing (NGS) can drive more personalized and accurate treatment options for cancer patients.

“Our presence at AMP 2024 underscores NeoGenomics’ dedication to advancing cancer care through ongoing research in precision medicine,” said Warren Stone, CCO of NeoGenomics. “By continuing to improve our methods and technologies, we aim to enhance outcomes and set new standards for oncology testing.”

NeoGenomics’ presentations include:

- **A Solid Tumor Gene Fusion Next-Generation Sequencing Assay on the G4 Sequencing Platform**
 - Abstract #1874602: Friday, November 22 | 9:15-10:15 a.m. PST
 - The study highlights the G4 platform as a reliable and efficient alternative for clinical and genomic research applications, delivering high accuracy, speed, and flexibility.
- **Effect of Genomic DNA Contamination in Cell-Free DNA on the Assay Performance of TSO500 ctDNA v2**
 - Abstract #1874288: Friday, November 22 | 9:15-10:15 a.m. PST
 - The data shows that the TSO500 ctDNA v2 assay maintains high sensitivity for detecting tumor mutations, even with significant genomic DNA contamination, ensuring reliable results for cancer profiling through liquid biopsy.
- **An Enhanced Workflow for the Neo Comprehensive™ Solid Tumor Genome Profiling Assay: Comparison for Tecan Qubit vs KAPA Library Quantification**
 - Abstract #1874050: Friday, November 22 | 9:15-10:15 a.m. PST
 - The study validates an improved workflow for the Neo Comprehensive™ solid tumor genome profiling NGS panel, offering significant time savings and reducing errors while maintaining equivalent accuracy and performance.
- **Human Papillomavirus Subtyping Using Whole Transcriptome Sequencing**
 - Abstract #1874277: Saturday, November 23 | 9:15-10:15 a.m. PST
 - The data demonstrates that NeoGenomics’ bioinformatics pipeline can identify

and classify HPV cases into high and low-risk subtypes with similar performance to more traditional methods, delivering added value and potential cost savings for patients.

NeoGenomics will also host a corporate workshop on November 20, 8-8:50 a.m. PST, titled "Clinical Utility of Comprehensive Genomic Profiling (CGP) for Myeloid Neoplasms." The session will highlight the utility of myeloid comprehensive genomic profiling across a broad spectrum of categories, including acute myeloid leukemia, where rapid genomic testing may lead to improved patient outcomes.

About NeoGenomics, Inc.

NeoGenomics, Inc. specializes in cancer genetics testing and information services, providing one of the most comprehensive oncology-focused testing menus for physicians to help them diagnose and treat cancer. The Company's Advanced Diagnostic Division also serves pharmaceutical clients in clinical trials and drug development.

Headquartered in Fort Myers, FL, NeoGenomics operates CAP accredited and CLIA certified laboratories for full-service sample processing in Fort Myers, Florida; Aliso Viejo and San Diego, California; Research Triangle Park, North Carolina; and Houston, Texas; and a CAP accredited full-service, sample-processing laboratory in Cambridge, United Kingdom. NeoGenomics also has several, small, non-processing laboratory locations across the United States for providing analysis services. NeoGenomics serves the needs of pathologists, oncologists, academic centers, hospital systems, pharmaceutical firms, integrated service delivery networks, and managed care organizations throughout the United States, and pharmaceutical firms in Europe and Asia.

Forward-Looking Statements

This press release includes forward-looking statements. These forward-looking statements generally can be identified by the use of words such as "anticipate," "expect," "plan," "could," "would," "may," "will," "believe," "estimate," "forecast," "goal," "project," "guidance," "plan," "potential" and other words of similar meaning, although not all forward-looking statements include these words. This press release includes forward-looking statements. These forward-looking statements address various matters, including statements regarding improving operational efficiency, returning to profitable growth and its ongoing executive recruitment process. Each forward-looking statement contained in this press release is subject to a number of risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statement. Applicable risks and uncertainties include, among others, the Company's ability to identify and implement appropriate financial and operational initiatives to improve performance, to identify and recruit executive candidates, to continue gaining new customers, offer new types of tests, integrate its acquisitions and otherwise implement its business plan, and the risks identified under the heading "Risk Factors" contained in the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q and the Company's other filings with the Securities and Exchange Commission.

We caution investors not to place undue reliance on the forward-looking statements

contained in this press release. You are encouraged to read our filings with the SEC, available at www.sec.gov, for a discussion of these and other risks and uncertainties. The forward-looking statements in this press release speak only as of the date of this document (unless another date is indicated), and we undertake no obligation to update or revise any of these statements. Our business is subject to substantial risks and uncertainties, including those referenced above. Investors, potential investors, and others should give careful consideration to these risks and uncertainties.
