

Fujitsu Scales Automation Enterprise-Wide with UiPath to Meet Digital Transformation Goals

With UiPath as one of the solution partners of Fujitsu's FujiTra project, Fujitsu aims to increase workforce efficiency by 40%

NEW YORK--(BUSINESS WIRE)-- UiPath (NYSE: PATH), a leading <u>enterprise automation</u> <u>and AI</u> software company, today announced that Fujitsu, the leading <u>Japanese information</u> <u>and communication technology</u> company, is scaling the use of the UiPath AI-powered Business Automation Platform enterprise-wide.

Fujitsu is a digital transformation partner of choice for businesses globally. It is dedicated to providing trusted technology services, solutions, and products to support businesses in their digitalization journeys.

In seeking to enhance its competitiveness in the digital age, Fujitsu launched an enterprisewide digital transformation project in October 2020. The project, known as FujiTra (Fujitsu Transformation), aims at a complete reevaluation and transformation of Fujitsu's business processes, organizations, and corporate culture, in addition to its products, services, and business models.

Recognizing the value of Al-powered automation in transforming its business, Fujitsu selected UiPath as its solution partner for the FujiTra project to scale automation across its global business. Fujitsu has been using UiPath solutions in more than 140 individual departments globally since 2017, achieving significant time savings.

As part of the expanded collaboration, UiPath will help Fujitsu optimize existing business processes and design new automation-led business processes to realize the full potential of its automation deployment. The partnership will also help Fujitsu streamline operations and boost workforce efficiency in anticipation of future workforce changes. By implementing several measures, including UiPath solutions, Fujitsu aims to maintain productivity levels in the short term and increase workforce efficiency by as much as 40% in the long term.

"We see automation as a strategic priority that will help Fujitsu accelerate its business transformation. Since implementing UiPath solutions in 2017, we have seen the incredible ability of automation to deliver value and business growth," said Yuzuru Fukuda, Corporate Executive Officer, Executive Vice President, Chief Digital Transformation Officer and Chief Information Officer, Fujitsu. "We are confident that UiPath will continue to be a trusted partner in our automation journey, and we are excited to extend the benefits of Al-powered automation across our global business."

"Global leading brands like Fujitsu are leveraging AI and automation to achieve increased

productivity, cost savings, and operational gains," said Rob Enslin, Chief Executive Officer at UiPath. "Fujitsu exemplifies how companies can integrate AI and automation for enterprise-wide transformation. We're excited to continue partnering with them on this digital journey."

As part of its collaboration, UiPath will also help Fujitsu equip its workforce with automation skills and become citizen developers through automation courses on UiPath Academy as well as through the open badge system, in addition to hands-on and technical consultations.
