UiPath Offers Complimentary Trial of Automation Cloud Public Sector to Assist U.S. Government Agencies' Efficiency Initiatives

NEW YORK--(BUSINESS WIRE)-- UiPath (NYSE: PATH), a leading enterprise automation and AI software company, today announced a comprehensiveAutomation Cloud™ Public Sector free trial designed to help government agencies address operational challenges and drive productivity improvements.

Public sector organizations have specific requirements that demand robust, secure, and compliant software solutions. Automation Cloud Public Sector is a cloud-based solution tailored to the specific requirements of public sector organizations in the United States that enables measurable efficiency gains.

"In an era of rapidly changing policy mandates and increasing efficiency requirements, automation has moved beyond a strategic priority to become a necessity," said Chris Radich, Public Sector Chief Technology Officer at UiPath. "Government agencies handle vast amounts of sensitive data, from citizen records to financial transactions, making data security and privacy paramount. UiPath is a proud strategic partner of public sector organizations and has years of experience building Automation Centers of Excellence. These initiatives have systematically eliminated millions of hours of repetitive work, which saves taxpayer money and allows talented public servants to focus on mission-critical initiatives that directly serve the American people."

UiPath Automation Cloud Public Sector holds FedRAMP Moderate compliance, adhering to the rigorous security controls mandated by the Federal Risk and Authorization Management Program. This authorization offers public sector agencies a viable and secure method to achieve aggressive efficiency mandates.

The 60-day free trial of Automation Cloud Public Sector provides government leaders in federal, state, or local agencies with access to critical automation solutions such as process mining, AI-powered Document Understanding, unattended and attended robots, low-code apps, and other capabilities. It offers a pragmatic solution to:

- decrease administrative costs
- improve spend management and transparency
- accelerate document processing with out of the box M/L models
- demonstrate tangible operational improvements

"Government agencies require practical, implementable solutions to meet evolving operational demands. Our trial provides a direct pathway to measurable efficiency gains,"

said Dave Melvin, Vice President of Public Sector at UiPath.

Government agencies can visit here to contact UiPath to enroll in the Automation Cloud Public Sector free trial.

In addition, register here for the UiPath on Tour Agentic Automation Summit in Washington, D.C. on April 29. The annual summit, titled "Ushering in the Era of Efficiency", will feature prominent government leaders discussing how they are transforming their agencies with agents, robots, and people.

About UiPath

UiPath (NYSE: PATH) develops AI technology that mirrors human intelligence with ever-increasing sophistication, transforming how businesses operate, innovate, and compete. The UiPath Platform™ accelerates the shift toward a new era of agentic automation—one where agents, robots, people, and models integrate seamlessly to enable autonomous processes and smarter decision making. With a focus on security, accuracy, and resiliency, UiPath is committed to shaping a world where AI enhances human potential and revolutionizes industries.
