UiPath Recognizes Fast Track Partners for Their Innovation with Agentic Automation

Global partners are recognized for establishing their commitment to ushering in the agentic era for customers with early access to the UiPath Platform™ for agentic automation and training

NEW YORK--(BUSINESS WIRE)-- UiPath (NYSE: PATH), [a global leader in agentic automation](#), today honored partners with a badge of distinction for being a UiPath Agentic Automation Fast Track Partner. This recognition is granted to select UiPath partners that have received early access and training in agentic automation capabilities from UiPath, have identified use cases for customers where agents can help augment end-to-end process automation, and have contributed to further development of UiPath agentic automation solutions.

A new era for automation — agentic automation — is an evolutionary leap from robotic process automation that combines AI agents, robots, and people to deliver transformation enterprise-wide. Agentic automation gives agents the power to plan, work, and make decisions with minimal human oversight. With agentic automation, organizations can expand their potential by focusing not just on isolated task automation, but on entire end-to-end processes that are often complex and multi-dependent in nature. It provides business leaders with the opportunity to mentor, doctors more time to care for patients, developers the ability to fine-tune their work, engineers the freedom to innovate, and customers the seamless and personalized experiences they've been promised.

The badge of distinction for Fast Track Partners demonstrates an outstanding commitment from UiPath partners to deliver an orchestrated enterprise for customers through a combination of AI agents, robots, people, AI models and other tools to orchestrate and automate end-to-end enterprise processes. These partners are distinguished as the first in the UiPath Partner Network to accelerate the adoption of the UiPath Platform™ for agentic automation, enabling everyone to begin building, deploying, and managing agents.

“Our partners play a critical role in the agentic future of UiPath, from identifying use cases to providing product feedback to co-innovating to help solve customers’ toughest challenges,” said Ashim Gupta, Chief Financial Officer and Chief Operating Officer at UiPath. “I’m thrilled to congratulate our partners on this recognition as a UiPath Agentic Automation Fast Track Partner. They have earned this distinction by receiving hands-on training with the UiPath Platform for agentic automation and establishing their commitment to ushering in the agentic era for customers.”

The [UiPath Partner Program](#) enables partners to gain a competitive advantage to grow their business and increase profitability. UiPath is the industry’s first enterprise-grade [platform for agentic automation](#) and is designed to transform the way humans work. The UiPath Platform

™ for agentic automation accelerates the shift toward a new era of agentic automation—one where agents, robots, people, and models integrate seamlessly to enable autonomous processes and smarter decision making. With a focus on security, accuracy, and resiliency, UiPath is committed to shaping a world where AI enhances human potential and revolutionizes industries.
