

Investor Presentation

July 2025

Forward-looking statements

This presentation includes certain terms and non-GAAP financial measures that are not specifically defined herein. These terms and financial measures are defined and, in the case of the non-GAAP financial measures, reconciled to the most directly comparable GAAP measure, in our quarterly Earnings Release and Supplemental Information that is available on our investor relations website at www.ir.prologis.com and on the SEC's website at www.sec.gov.

The statements in this document that are not historical facts are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements are based on current expectations, estimates and projections about the industry and markets in which we operate as well as management's beliefs and assumptions. Such statements involve uncertainties that could significantly impact our financial results. Words such as "expects," "anticipates," "intends," "plans," "believes," "seeks," and "estimates" including variations of such words and similar expressions are intended to identify such forward-looking statements, which generally are not historical in nature. All statements that address operating performance, events or developments that we expect or anticipate will occur in the future—including statements relating to rent and occupancy growth, acquisition and development activity, contribution and disposition activity, general conditions in the geographic areas where we operate, expectations regarding new lines of business, our debt, capital structure and financial position, our ability to earn revenues from co-investment ventures, form new co-investment ventures and the availability of capital in existing or new co-investment ventures—are forward-looking statements. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict. Although we believe the expectations reflected in any forward-looking statements are based on reasonable assumptions, we can give no assurance that our expectations will be attained and, therefore, actual outcomes and results may differ materially from what is expressed or forecasted in such forward-looking statements. Some of the factors that may affect outcomes and results include, but are not limited to: (i) international, national, regional and local economic and political climates and conditions; (ii) changes in global financial markets, interest rates and foreign currency exchange rates; (iii) increased or unanticipated competition for our properties; (iv) risks associated with acquisitions, dispositions and development of properties, including the integration of the operations of significant real estate portfolios; (v) maintenance of Real Estate Investment Trust status, tax structuring and changes in income tax laws and rates; (vi) availability of financing and capital, the levels of debt that we maintain and our credit ratings; (vii) risks related to our investments in our co-investment ventures, including our ability to establish new co-investment ventures; (viii) risks of doing business internationally, including currency risks; (ix) environmental uncertainties, including risks of natural disasters; (x) risks related to global pandemics; and (xi) those additional factors discussed in reports filed with the Securities and Exchange Commission by us under the heading "Risk Factors." We undertake no duty to update any forward-looking statements appearing in this document except as may be required by law.

This document shall not constitute an offer to sell or the solicitation of an offer to buy any securities, nor shall there be any sale of securities in any jurisdiction in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such jurisdiction. No offering of securities shall be made except by means of a prospectus meeting the requirements of Section 10 of the U.S. Securities Act of 1933, as amended.

The background of the slide is a photograph of a warehouse interior. A conveyor belt runs diagonally from the bottom left towards the upper right. Several cardboard boxes of various sizes are on the belt. In the background, there are blue metal shelving units filled with more boxes. The lighting is bright and industrial.

Section 1

Why logistics real estate

- Essential infrastructure for commerce
- Structural demand
- Inflation-plus market rent growth
- Long-term outperformance

Essential infrastructure for commerce

Robust structural trends

More space needs

Demand | e-commerce¹

Quarterly volume of sales, \$B, SA

Limited supply

Supply | further out²

New development average distance from city center, miles

1. Source: U.S. Census Bureau.
2. Source: Prologis Research.

Diverse demand drivers

Basic daily needs¹

Population, M

~38% of our customers service basic daily needs, benefiting from population growth

Cyclical spending²

Lifestyle upgrades, \$B per quarter

~30% of our customers benefit from cyclical spending patterns

Structural trends³

E-commerce sales, \$B per quarter

~32% of our customers grow because of structural trends, like e-commerce

Source: Prologis Research, U.S. Census, BEA, Euromonitor.

1. Examples include food and beverage, apparel, fast-moving consumer goods, packaging and plastics.
2. Examples include auto, construction, electronics, appliances and home goods.
3. Examples include general retail, transportation and healthcare.

E-commerce multiplier effect

E-commerce sales

\$B

Space intensity

SF per \$B of sales

Why is e-commerce more space intensive?

1. Higher product variety
2. Greater inventory
3. Parcels vs. pallets
4. Reverse logistics

Customer proximity is valuable

Distribution of supply chain costs

%

Long term rent and value growth

Net effective rent, U.S.¹
