Riot Blockchain's TessPay Signs Letter of Intent for Merger with Publicly Traded Cresval Capital Corp

CASTLE ROCK, Colo., Dec. 11, 2017 /PRNewswire/ -- Riot Blockchain Inc. (Nasdaq: RIOT) (the "Company") today announced that its majority owned Tess Inc. ("TessPay") has entered into a non-binding letter of intent ("LOI") to merge with Cresval Capital Corp. ("Cresval") (TSX-V: CRV). TessPay is a blockchain company developing a supply chain payment platform for businesses to attempt to guarantee payment on time and in full. After the closing of the anticipated merger, TessPay will be publicly traded on the TSX Venture Exchange (the "TSXV") and change its name to "TessPay Inc."

The LOI provides that TessPay will be issued 80,000,000 shares of Cresval, and the present shareholders of Cresval will retain 8,400,000 shares of the combined company TessPay post-merger. Riot Blockchain will receive 41,600,000 shares resulting from its 52% ownership of TessPay.

Assuming that TessPay and Cresval enter into a definitive agreement, the parties expect that the merger can be completed by the 2nd quarter of 2018. No assurance can be given that a definitive agreement will be entered into, that the proposed merger will be consummated, or that the combined company will be able to obtain adequate funds needed to fund its business plan.

The merger would be the first of Riot Blockchain's investments to become a stand-alone public company. Haywood Securities Inc acted as a financial advisor on the transaction.

Jeff Mason, Chief Executive Officer of TessPay, stated, "The decision to take the company public provides us access to traditional capital markets as we continue developing our blockchain technology solution. This environment will also foster transparency and accountability moving forward, providing confidence to investors and prospective customers alike."

The blockchain is a decentralized and encrypted ledger that offers a secure, efficient, verifiable and permanent way of storing records and other information without the need for intermediaries. These protocols are the backbone of numerous digital currencies, including Bitcoin, Ethereum and Litecoin. Blockchain protocols have a wide range of use, including processing transactions, accounting, verification and proof of ownership across a far-reaching spectrum of applications.

About Riot Blockchain

Riot Blockchain, Inc. is leveraging its expertise and a network of professional advisors to

build and support blockchain technologies. It is establishing an Advisory Board with technical experience intending to become a leading authority and supporter of blockchain, while providing investment exposure to the rapidly growing Bitcoin and blockchain ecosystems. For more information, visit <http://www.RiotBlockchain.com/>.

About TessPay

TessPay is a blockchain company developing a payments ecosystem for component and sub-component supply chain settlements (payments). TessPay believes a transition will occur from the present state wherein payments down a supply chain are essentially manual (triggered by a manager or trusted party) to a blockchain protocol that mandates simultaneous payment of all component and sub-component suppliers when the primary party makes a payment into the chain.

TessPay intends to develop and utilize TessPay Smart Contracts, wherein a payment from the primary party in the chain would be automatically apportioned to all other eligible parties in the chain concomitant with payment by the primary party. The creditworthy financial condition of the primary party would facilitate lender involvement in the supply chain under the security afforded by the TessPay Smart Contract. The first TessPay smart contracts payment system will be tailored to the needs of the international telecommunications industry in respect of cross border telephone calls. For more information, visit <http://tesspay.io/>.
