Tecogen Sells Two Ultra InVerde Combined Heat and Power (CHP) Systems to North Central New Jersey School District

WALTHAM, Mass., March 4, 2015 /PRNewswire/ -- Tecogen[®] Inc. (NASDAQ: TGEN) today announced the sale and delivery of two INV-100 Ultra InVerde[®] combined heat and power (CHP) units to provide domestic hot water and space heating to a school district located in North Central New Jersey. The sale, through a regional office of a multi-national Energy Services Company (ESCO), is part of a comprehensive energy savings project for the school district. The units will be installed separately, one in a middle school, the other in a high school.

"School districts and other public entities looking at large-scale energy savings programs turn to ESCO's to develop and implement the best energy technology solutions," said Robert Panora, President and COO of Tecogen. "These companies have come to regard our products as standard tools in their large-scale energy assessments, which are highly complementary to our direct sales efforts in the private sector."

The units will provide each school with backup power in the event of an outage and are equipped with Tecogen's patented low emissions system, Ultra, which exempts the units from requiring state air permits and the related obligations (regular third party tests, etc.).

About Tecogen

Tecogen manufactures, installs, and maintains high efficiency, ultra-clean combined heat and power products including natural gas engine-driven cogeneration, air conditioning systems, and high-efficiency water heaters for industrial and commercial use. For more than 20 years, Tecogen has shipped more than 2,000 units, supported by an established network of engineering, sales, and service personnel across the United States. Energy efficiency along with nearly eliminating criteria pollutants, Tecogen products are the solution to lower greenhouse gases and pollution. For more information, please visit www.tecogen.com.
