Evolv Launches Global Tour Showcasing the First Free-flow Smart Threat Detection

The Experience Evolv Tour Will Showcase 'Only-From-Evolv' Capabilities: Threats are Identified in Real-Time as Thousands of People Per Hour are Screened, Visitors Naturally Walk Through Screening Without Emptying Pockets or Removing Bags

BOSTON--(BUSINESS WIRE)-- [Evolv Technology](#), the leader in free-flow smart threat detection, today announced the first in a series of upcoming "Experience Evolv" live events where security teams and venue operators can experience how Evolv prevents active shooters and bombers from entering public venues and workplaces. The first event was held on August 8th at Rosewood Sand Hill in Menlo Park, CA.

Evolv prevents attackers from bringing weapons into public venues and workplaces with the only free-flow smart threat detection that can screen thousands of people per hour without requiring visitors to stop and empty pockets or remove bags.

"Evolv was founded with a clear mission to keep people safe while providing a positive visitor security experience," said Peter George, Chief Commercial Officer of Evolv Technology. "In this era of viral violence, it is critical that security professionals have every option at their disposal to protect visitors to their venues. The Experience Evolv Tour will give them a first-hand opportunity to see the latest weapons screening in action and demonstrate how their venues can prioritize the security of their visitors."

By combining the latest sensors and the Evolv Cortex AI Software Platform, Evolv can instantly distinguish between threats such as a gun, versus common items like cell phones, while screening thousands of people per hour. When a threat is detected, Evolv immediately identifies the person and location of the weapon on the person's body, providing security teams with precision threat prevention while improving clearance throughput by more than 10x.

Attendees of Experience Evolv will be able to discuss innovative security applications, hear customer testimonials and talk to industry leading security experts on risk-based screening and how organizations can prioritize targeting the weapons that present the most danger.

Experience Evolv events are planned for Atlanta, Boston, Chicago, Washington DC, Denver, Houston, Los Angeles, Las Vegas, New York, Philadelphia, Portland, Seattle and Southern Florida, as well as Europe and Asia.

ABOUT EVOLV TECHNOLOGY

Evolv Technology prevents attackers from bringing weapons into public venues and places of work. Organizations such as Lincoln Center, Oakland Airport, Gillette Stadium, and L.L. Bean use Evolv's free-flow smart threat detection to prevent active shooters and bombers from entering their venues while providing a non-intrusive experience. By fusing the latest

sensors and software AI, Evolv delivers the only free-flow smart threat detection that can screen thousands of people, without the need to stop, and empty pockets or bags. Evolv reduces the burden on security teams and takes the hassle out of people screening at places of work, transportation hubs, sports stadiums, entertainment venues, hotels and conference centers, airports, houses of worship, and government agencies.
