

COLUMBUS COATINGS FACT SHEET

The Columbus Coatings operations include a hot-dip galvanizing facility in Columbus, Ohio, and a processing facility in nearby Obetz, Ohio. The central Ohio locations provide good shipping access with excellent highway and rail transport. Two zinc pots enable the transition between coatings to be accomplished promptly while allowing for longer exposed runs. The plant produces hot-dip galvanized sheet, using cold-rolled coils supplied by other Cleveland-Cliffs facilities.

Facility Facts

Plant Leadership	Raja Veluchamy
Union Leadership	Fred Silvia, United Steelworkers (USW)
Acreage	88, hosting two facilities with 443,000 square footage
Products	Hot-dip galvanized sheet and galvanized sheet
Markets Served	Automotive and distribution
Principal Production Facilities	72-inch hot-dipped galvanizing line; facilities two 72-inch rewind lines
Certifications	IATF 16949 Certificate

About Cleveland-Cliffs

Cleveland-Cliffs is a leading North America-based steel producer with focus on value-added sheet products, particularly for the automotive industry. The Company is vertically integrated from mined raw materials, direct reduced iron, and ferrous scrap to primary steelmaking and downstream finishing, stamping, tooling, and tubing. Cleveland-Cliffs is headquartered in Cleveland, OH with mining, steel and downstream manufacturing operations located across the U.S. and Canada. For more information, visit www.clevelandcliffs.com.
