Equifax Launches Credit Abuse Risk Model to Help Protect Lenders Against the Rising Financial Impact of First-Party Fraud

New Behavioral Insights Detect Potential Credit Washing or Loan Stacking Activities to Drive More Confident Lending Decisions

ATLANTA, Jan. 30, 2026 /PRNewswire/ -- [Equifax](#)® (NYSE: EFX) today announced the launch of [Credit Abuse Risk](#), a new predictive model that uses FCRA-regulated data and is designed to help protect lenders against first-party fraud and drive more confident lending decisions.

As the financial impact of first-party fraud continues to rise, Credit Abuse Risk was developed to uncover atypical patterns indicative of two types of fraudulent activities: loan stacking, when an individual quickly applies for multiple loans with no intent to repay those loans, and credit washing, when a person tries to remove accurate, but negative information from a credit report. These patterns can be identified during prequalification offers, account origination, or portfolio review. This allows lenders to modify loan terms based on FCRA-compliant insights.

"By focusing on application behavior in real-time, Credit Abuse Risk quickly helps to reduce the potential for fraud and related costs," said Felipe Castillo, Chief Product Officer for U.S. Information Solutions at Equifax. "This supports a more confident lending environment, and helps keep credit available for consumers."

Credit Abuse Risk features include:

- **Enhanced insights:** The model focuses on behavioral indicators that provide a clear view of atypical credit activity.
- **Targeted decisioning:** Specifically designed to address the lifecycle of fraud, from the building of inflated credit profiles to a sudden influx of disputes on unpaid accounts that falls outside the normal range, without limiting the important consumer protections to correct inaccurate or incomplete credit data.
- **Comprehensive portfolio protection:** Provides lenders with important insights across all credit tiers.
- **Actionable intelligence:** Allows lenders to make real-time, regulated decisions on credit terms for a consumer, providing an FCRA-compliant score with adverse action

reason codes.

A Comprehensive, Layered Defense

Credit Abuse Risk is a vital component of the Equifax layered fraud defense strategy to help inform better lending decisions. It works alongside [Synthetic Identity Risk](#) tools to provide a complete view of identity legitimacy and hidden repayment risk.

For more information on Credit Abuse Risk and the Equifax suite of fraud solutions, please visit our [website](#). Financial Institutions who prefer to validate effectiveness on their own historical data can evaluate the [Credit Abuse Risk](#) model through a secure, data-driven evaluation test.
