MANHATTAN BEACH, Calif.--(BUSINESS WIRE)-- SKECHERS USA, Inc. (NYSE:SKX), a global footwear leader, today announced financial results for the third quarter ended September 30, 2018.

Third Quarter Highlights

- **Record sales of \$1.176 billion, an increase of 7.5 percent, or 8.5 percent on a constant currency basis**
- **International wholesale sales increased 11.8 percent**
- **Company-owned global retail sales increased 10.6 percent**
- **Total international wholesale and retail sales combined represented 55.5 percent of total sales**
- **Diluted earnings per share of \$0.58**

“Achieving record third quarter sales is a notable accomplishment given the strength of our third quarter 2017 sales,” began Robert Greenberg, Skechers chief executive officer. “Both our domestic and international businesses grew, and we remained the leader in walking, work, casual lifestyle and sandals footwear in the United States. We experienced strong product successes across multiple divisions around the world, which was evident by our double-digit growth in both our international wholesale and worldwide Company-owned retail businesses. Skechers D’Lites, our heritage chunky style that has seen great success over the last two years in Asia, is now an in demand style across North America and Europe, and is poised for growth in South America, India and the Middle East. Through Skechers D’Lites, we are reaching a younger, more fashion-savvy audience, and getting press—from *Marie Claire* and *Elle* to *HypeBae* and *Highsnobiety*—and social media influencers are embracing this signature look. Further, we are seeing renewed acceptance of this chunky style by men. Our core footwear categories for men, women, work and golf are also performing well. We are achieving this growth with the right product mix combined with a balanced approach to marketing spend. As we continue to invest in our international infrastructure, we believe there is significant opportunity to grow our brand further through both wholesale, and Company-owned and third-party retail stores, which now stand at 2,802 locations worldwide. We’re looking forward to fourth quarter growth across both our domestic and international channels and a new annual sales record.”

“As we near the close of 2018, we believe the direction of our business is on target with our record sales in the third quarter, continued international growth and strong gross margins,” stated David Weinberg, chief operating officer of Skechers. “With three record sales quarters in 2018 and brand acceptance around the globe, we achieved a new record for the first nine months of \$3.56 billion, an 11.5 percent increase over last year. In the third quarter, our

international distributor business returned to growth, increasing 11.6 percent over the same period last year, and combined with our international joint venture and subsidiary business, our total international wholesale sales increased 11.8 percent for the period. International wholesale along with international retail now represents 55.5 percent of our total business. We expect our business in the United States—both wholesale and retail—to grow in the fourth quarter. We remain committed to efficiently and profitably growing our global footwear business.”

Its **domestic wholesale** business decreased 3.0 percent. The Company’s total international business grew 12.5 percent and its total domestic business grew 1.8 percent. Third quarter **comparable same store sales** in Company-owned retail stores worldwide increased 1.9 percent, including an increase of 3.0 percent in the United States offset by a decrease of 0.8 percent in its international stores.

Gross margins slightly increased as higher domestic margins from improved retail pricing and product mix were partially offset by the impact of negative foreign currency exchange rates.

The \$37.8 million increase in **general and administrative expenses** was primarily the result of the Company’s continued commitment to build its international brand presence and direct-to-consumer channels. General and administrative

expenses in China grew \$7.5 million to support continued expansion, including preparation for next month's Single's Day, and \$13.3 million associated with operating 58 additional Company-owned Skechers stores worldwide, of which 13 opened in the third quarter. General and administrative expenses also included \$11.1 million related to corporate and domestic operations, of which \$4.8 million was for increased domestic warehouse and distribution costs.

Earnings from operations increased \$7.4 million, or 6.4 percent.

Net earnings were \$90.7 million and **diluted earnings per share** were \$0.58. In the third quarter, the Company's income tax rate was 13.7 percent reflecting its continued assessment of the impact of the recently enacted tax reform legislation. Certain Non-GAAP Measures

We use the non-GAAP financial measures discussed below to evaluate our results of operations, financial condition, liquidity and indebtedness. We believe that the presentation of these non-GAAP measures provides useful information to investors regarding financial and business trends related to our results of operations, cash flows and indebtedness and that when this non-GAAP financial information is viewed with our GAAP financial information, investors are provided with valuable supplemental information regarding our results of operations, thereby facilitating period-to-period comparisons of our business performance and is consistent with how management evaluates the company's operating performance and liquidity. In addition, these non-GAAP measures address questions the company routinely receives from analysts and investors and, in order to assure that all investors have access to similar data the company has determined that it is appropriate to make this data available to all investors. None of the non-GAAP measures presented should be considered as an alternative to net income or loss, operating income, cash flows from operating activities, total indebtedness or any other measures of operating performance and financial condition, liquidity or indebtedness derived in accordance with GAAP. These non-GAAP measures have important limitations as analytical tools and should not be considered in isolation or as substitutes for an analysis of our results as reported under GAAP. Our use of these terms may vary from the use of similarly-titled measures by others in our industry due to the potential inconsistencies in the method of calculation and differences due to items subject to interpretation.

Constant Currency Adjustment⁽¹⁾

We evaluate our results of operations on both an as reported and a constant currency basis. The constant currency presentation, which is a non-GAAP measure, excludes the impact of period-over-period fluctuations in foreign currency exchange rates. We believe providing constant currency information provides valuable supplemental information regarding our results of operations, thereby facilitating period-to-period comparisons of our business performance and is consistent with how management evaluates the company's performance. We calculate constant currency percentages by converting our current period local currency financial results using the prior-period exchange rates and comparing these adjusted amounts to our prior period reported results. No adjustment has been made to foreign currency exchange transaction gains or losses in the calculation of constant currency net income.
