FRAMINGHAM, MA / ACCESSWIRE / November 22, 2024 [Xenetic Biosciences, Inc.](#) (NASDAQ:XBIO) ("Xenetic" or the "Company"), a biopharmaceutical company focused on advancing innovative immune-oncology technologies addressing hard to treat cancers, today announced that announced that [Dr. Reid Bissonnette, Executive Consultant for Translational Research and Development](#) at Xenetic participated in a [Virtual Investor "What This Means" segment](#).

As part of the segment, Dr. Bissonnette discussed key highlights from the Company's recent positive data demonstrating DNase I significantly improves efficacy of anti-CTLA-4 immune checkpoint blockade in preclinical models of microsatellite stable/mismatch repair proficient (MSS/MMRp) colorectal carcinoma (CRC) which was presented at the [Society for Immunotherapy of Cancer \(SITC\) 39th Annual Meeting](#). MSS/MMRp CRC represents approximately 85% of CRC patients, and for which immune checkpoint blockade agents have provided meager benefit.

The Virtual Investor "What This Means" segment featuring Xenetic is now available [here](#).

About Xenetic Biosciences

Xenetic Biosciences, Inc. is a biopharmaceutical company focused on advancing innovative immune-oncology technologies addressing hard to treat cancers. The Company's DNase platform is designed to improve outcomes of existing treatments, including immunotherapies, by targeting neutrophil extracellular traps (NETs), which are involved in cancer progression. Xenetic is currently focused on advancing its systemic DNase program into the clinic as an adjunctive therapy for pancreatic carcinoma and locally advanced or metastatic solid tumors.

Forward-Looking Statements

This press release contains forward-looking statements that we intend to be subject to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. All statements contained in this press release other than statements of historical facts may constitute forward-looking statements within the meaning of the federal securities laws. These statements can be identified by words such as "expects," "plans," "projects," "will," "may," "anticipates," "believes," "should," "intends," "estimates," "remain," "focus", "confidence in", "potential", and other words of similar meaning, including, but not limited to, all statements regarding expectations for our DNase-base oncology platform, including statements regarding: our growing body of preclinical data evaluating the DNase-based oncology platform across a number of high-value oncology indications, ongoing progress towards first in human clinical study for locally advanced or metastatic solid tumors, our strategic focus on exploratory investigator-initiated studies with institutional partners, including leveraging institutional partnerships to drive our development strategy, our focus on advancing innovative immune-oncology technologies addressing hard to treat cancers, our expectations regarding preclinical data generated to date, our focus on building a growing body of data and further developing our pipeline to build value in the near and long term, our plans regarding presentations of the results of preclinical data, the DNase platform improving outcomes of existing treatments, including immunotherapies, by targeting neutrophil extracellular traps (NETs), which are involved in cancer progression, and our focus on advancing our systemic DNase program towards Phase 1 clinical development as an adjunctive therapy for the treatment of pancreatic carcinoma and other locally advanced or metastatic solid tumors. Any forward-looking statements contained herein are based on current expectations and are subject to a number of risks and uncertainties. Many factors could cause our actual activities, performance, achievements, or results to differ materially from the activities and results anticipated in forward-looking statements. Important factors that could cause actual activities, performance, achievements, or results to differ materially from such plans, estimates or expectations include, among others, (1) unexpected costs, charges or expenses resulting from our manufacturing and collaboration agreements; (2) unexpected costs, charges or expenses resulting from the licensing of the DNase platform; (3) uncertainty of the expected financial performance of the Company following the licensing of the DNase platform; (4) failure to realize the anticipated potential of the DNase or PolyXen technologies; (5) the ability of the Company to obtain funding and implement its business strategy; and (6) other risk factors as detailed from time to time in the Company's reports filed with the SEC, including its annual report on Form 10-K, periodic quarterly reports on Form 10-Q, current reports on Form 8-K and other documents filed with the SEC. The foregoing list of important factors is not exclusive. In addition, forward-looking statements may also be adversely affected by general market factors, general economic and business conditions, including potential adverse effects of public health issues, such as the COVID-19 outbreak, and geopolitical events, such as the conflicts in the Ukraine and in the Middle East, on economic activity, competitive product development, product availability, federal and state regulations and legislation, the regulatory process for new product candidates and indications, manufacturing issues that may arise, patent positions, litigation, and shareholder activism, among other factors. The forward-looking statements contained in this press release speak only as of the date the statements were made, and the Company does not undertake any obligation to update forward-looking statements, except as required by law.
