Flux Power Quality Management System for Lithium Forklift Batteries Earns ISO 9001:2015 Certification

Vista, Calif., Jan. 19, 2018 (GLOBE NEWSWIRE) -- -- Flux Power Holdings, Inc. (OTCQB: FLUX), a developer of advanced lithium batteries for industrial applications, announced today that the Company was awarded ISO 9001:2015 certification effective November 6, 2017 based on criteria and standards as outlined by the International Organization for Standardization (ISO) for Quality Systems Management. The standards provide guidance and tools for companies and organizations to ensure that their products and services meet customer requirements and that quality is consistently improved.

ISO 9001:2015 certifies that Flux continues to maintain a quality management system based on Quality Management Principles. Flux also focuses on consistency in product manufacturing and service while striving to exceed customer expectations. Additionally, it confirms strict attention to detail regarding management responsibility and resource management, as well as metrics that aim to maintain continuous improvements in all aspects of our business.

“This ISO certification achievement for Flux is a reflection of our commitment to high quality products and services and the process thereof,” said Flux CEO, Ron Dutt. “ISO certification is one of a series of technical achievements including UL 2271 Listing and OEM approvals that Flux has received in the last year. Flux continues to pass these engineering and operational milestones as a precursor to a significant ramp in materials handling customer orders and interest; the green shoots of which have already started to appear.”

Flux’s Technical and Industry Validation:

- ISO 9001:2015
- UL 2271 Listing
- UN 38.3 – required testing for the shipment of lithium batteries
- OEM Approvals from the three largest Forklift OEMs
- Flux has shipped over 1,000 LiFT Pack units to date

About Flux Power Holdings, Inc. (www.fluxpwr.com)

Flux Power develops advanced lithium-ion batteries for industrial uses, including its first-ever UL 2271 Listed lithium-ion “LiFT Pack” forklift batteries. Flux solutions utilize its proprietary battery management system (BMS) and in-house engineering and product design. Flux batteries deliver improved performance, extended cycle life and lower total cost of ownership than legacy lead-acid solutions. Flux sells primarily to lift equipment OEM’s, their dealers and battery distributors. Current products include advanced battery packs for motive power in the lift equipment and airport ground support markets.

About ISO (www.iso.org)

ISO is an independent, non-governmental international organization with a membership of 162 national standards bodies. International Standards make things work. They give world-class specifications for products, services and systems, to ensure quality, safety and efficiency. They are instrumental in facilitating international trade.
