Vuzix to Showcase Its New Pick & Pack Validation Program at MODEX 2026 to Accelerate Warehouse Deployment

- *Building on recent enterprise deployments, Vuzix' new solution kit enables rapid validation and scalable rollout of smart glasses workflows*

ROCHESTER, N.Y., April 13, 2026 /PRNewswire/ -- [Vuzix® Corporation](#) (NASDAQ: VUZI), ("Vuzix" or, the "Company"), a leading supplier of AI-powered smart glasses, waveguides and augmented reality (AR) technologies, today announced the launch of its Pick & Pack Validation Program, a kit-based hardware and software solution designed to accelerate deployment of smart glasses in warehouse and distribution environments. Building on recent successful enterprise deployments and expanding customer adoption, the program provides a streamlined path for organizations to validate and scale hands-free workflows using smart glasses, without complex integration or extended pilot cycles. Vuzix will showcase the Pick & Pack Validation Program at MODEX 2026, taking place April 13–16 at the Georgia World Congress Center in Atlanta.

Program participants receive a pre-configured starter kit that includes either the Vuzix M400 or LX1 smart glasses, preloaded with Mobilium, Vuzix' software platform compatible with SAP and other warehouse and enterprise systems. The kit includes five ready-to-run common warehouse workflows: pick assist, goods receipt, pack assist, pallet build, and bin audit. These workflows closely mirror real-world operations and allow customers to assess performance improvements within their own environments.

Designed to move customers from evaluation to operational use within days, the program provides a hands-on proof point demonstrating how smart glasses can improve picking accuracy, packing speed, receiving efficiency, and inventory control within an organization. By combining smart glasses hardware, software, and workflows into one package, the program accelerates time-to-value and provides a clear, low-risk path from evaluation to full deployment.

"Following recent successful enterprise deployments, we're seeing increasing demand for solutions that can move quickly from evaluation to scaled use," said Paul Travers, President and CEO of Vuzix. "Our Pick & Pack Validation Program is designed to reduce friction and

help more customers accelerate deployment of smart glasses within their operations."

MODEX 2026 participants wanting to explore the Pick & Pack Validation Program can connect with Robby Moss, robby_moss@vuzix.com, to set up an appointment during the show.

About Vuzix Corporation

Vuzix is a leading designer, manufacturer and marketer of AI-powered smart glasses, waveguides and augmented reality technologies, components and products for the enterprise, medical, defense, security agencies, and consumer markets. The Company's products include head-mounted smart personal display and wearable computing devices that offer users a portable high-quality viewing experience, provide solutions for mobility, wearable displays and augmented reality, as well OEM waveguide optical components and display engines. Vuzix holds more than 500 patents and patents pending and numerous IP licenses in the fields of optics, head-mounted displays, and the augmented reality wearables field. The Company has won over 20 Consumer Electronics Show (or CES) awards for innovation since 2005 and several wireless technology innovation awards among others.
