Add back stock-based compensation expense.....	1,485
Adjusted funds from operations available to common stockholders.....	<u>\$ 56,885</u>
Adjusted funds from operations per share available to common stockholders..	<u>\$ 0.5469</u>

Funds From Operations, ("FFO"), adjusted FFO, EBITDA, adjusted EBITDA, adjusted fixed charges, adjusted total debt, adjusted book capitalization and related ratios are non-GAAP financial measures. For purposes of the Securities and Exchange Commission's ("SEC") Regulation G, a non-GAAP financial measure is a numerical measure of a company's historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows (or equivalent statements) of the company, or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented. As used herein, GAAP refers to generally accepted accounting principles in the United States of America. Pursuant to the requirements of Regulation G, the Company has provided reconciliations of the non-GAAP financial measures to the most directly comparable GAAP financial measures.

The Company calculates and reports FFO in accordance with the definition and interpretive guidelines issued by the National Association of Real Estate Investment Trusts ("NAREIT"), and consequently, FFO is defined as net income (loss) available to common stockholders, adjusted for the effects of asset dispositions and certain non-cash items, primarily depreciation and amortization and impairments on real estate assets. The Company believes that FFO is an important supplemental measure of its operating performance. Because the historical cost accounting convention used for real estate assets requires depreciation (except on land), such accounting presentation implies that the value of real estate assets diminishes predictably over time, while real estate values instead have historically risen or fallen with market conditions. The term FFO was designed by the real estate industry to address this issue. FFO herein is not necessarily comparable to FFO of other real estate investment trusts, or REITs, that do not use the same definition or implementation guidelines or interpret the standards differently from the Company.

The Company uses FFO as one of several criteria to measure operating performance of its business. The Company further believes that by excluding the effect of depreciation, amortization, impairments on real estate assets and gains or losses from sales of real estate, all of which are based on historical costs and which may be of limited relevance in evaluating current performance, FFO can facilitate comparisons of operating performance between periods. The Company offers this measure to assist the users of its financial statements in analyzing its performance; however, this is not a measure of financial performance under GAAP and should not be considered a measure of liquidity, an alternative to net income or an indicator of any other performance measure determined in accordance with GAAP. Investors and potential investors in the Company's securities should not rely on non-GAAP financial measures as a substitute for any GAAP measure, including net income.

Adjusted FFO is calculated as FFO available to common stockholders excluding the impact of certain non-cash items and certain items of revenue and expense specified in the schedule above. The Company believes that adjusted FFO provides an enhanced measure of the operating performance of the Company's core portfolio as a REIT. Funds Available for Distribution is calculated as Adjusted FFO less scheduled principal payments on mortgages, non-cash interest expense and non-cash revenue, such as straight-line rent. Funds Available for Distribution provides a supplemental measure of the Company's ability to incur and service debt and to distribute dividends to shareholders. The Company's computation of adjusted FFO and Funds Available for Distribution are not comparable to the NAREIT definition of FFO or to similar measures reported by other REITs, but the Company believes they are appropriate measures for this Company.

Our ratios of adjusted total debt to annualized EBITDA and adjusted total debt to adjusted annualized EBITDA as of March 31, 2012 were 4.8x and 4.7x, respectively. EBITDA is defined as earnings before interest, taxes, depreciation and amortization. Adjusted EBITDA eliminates items such as impairments and nursing home revenues and expenses and adds back certain non-cash expenses, if any, to EBITDA. EBITDA, adjusted EBITDA and related ratios are non-GAAP financial measures. Annualized EBITDA and adjusted annualized EBITDA assume the current quarter results multiplied by four, and are not projections of future performance. Below is the reconciliation of EBITDA and adjusted EBITDA to net income.

Adjusted total debt / annualized EBITDA ratio..... **4.8 x**

Adjusted total debt / adjusted annualized EBITDA ratio..... **4.7 x**

Our annualized EBITDA to fixed charge coverage ratio, annualized adjusted EBITDA to total interest expense ratio and annualized adjusted EBITDA to fixed charge coverage ratio as of March 31, 2012 were 3.3x, 2.6x and 3.4x, respectively. Fixed charge coverage is the ratio determined by dividing annualized EBITDA by our fixed charges. Annualized EBITDA is defined as earnings before interest, taxes, depreciation and amortization. Annualized adjusted EBITDA eliminates items such as impairments and nursing home revenues and expenses and adds back certain non-cash expenses, if any, to annualized EBITDA.

Fixed charges consist of interest expense, amortization of other non-cash interest charges, amortization of deferred financing costs and refinancing costs. EBITDA, adjusted EBITDA, fixed charges and related ratios are non-GAAP measures. Below is the reconciliation of EBITDA to net income.

Percentages of total debt to book capitalization, adjusted total debt to adjusted book capitalization and adjusted total debt to total market capitalization at March 31, 2012 were 63.4%, 63.0% and 40.4%, respectively. Adjusted total debt is total debt plus the discount or less the premium derived from the sale of unsecured borrowings and fair market value adjustment of assumed debt. Book capitalization is defined as total debt plus stockholders' equity. Adjusted book capitalization is defined as adjusted total debt plus stockholders' equity. Adjusted total debt, adjusted book capitalization and related ratios are non-GAAP financial measures. Total market capitalization is the total market value of our securities as of March 31, 2012 plus adjusted total debt.
