

Building the Technical Moat

Dr. Alec Rose

Chief Scientist

Alec Rose

Over 10 years experience in the development of advanced and proprietary security screening solutions

Ph.D. Electrical and Computer Engineering

Chief Scientist

Chief Technology Officer Director of Advance Development How our Technical Journey Started in 2013...

There was a disconnect between the problem and the available technology

Since metal detectors were invented:

- The threat landscape had changed
- Consumer electronics had undergone a revolution

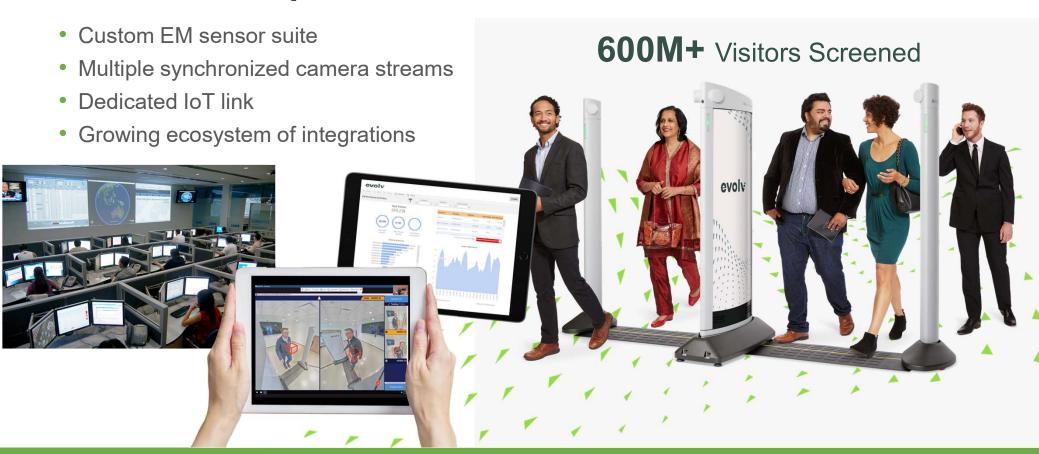

The Industry's Strongest IP Library

Accrued Portfolio of >100
Patents

Highlighted by contributions to:

United States Patent Application Publication (10) Pub. No.: US 2023/0071806 A **Robust Operation and** (43) Pub. Date: **Interference Suppression** SUPPRESSION OF INTERFERENCE IN THREAT DETECTION (52) U.S. Cl. Applicant: Evolv Technologies, Inc. ABSTRACT United States Patent (10) Patent No.: US 11,568,734 B2 Ellenbogen et al. (45) Date of Patent: Jan. 31, 2023 **Threat Discrimination** 54) PERSONNEL INSPECTION WITH THREAT (58) Field of Classification Search DETECTION AND DISCRIMINATION CPC . G08B 23/00; G08B 5/22; G01V 3/08; G01V 3/10; G01V 3/17; G06F 7/72; 71) Applicant: Evolv Technologies, Inc., Waltham United States Patent Application Publication (10) Pub. No.: US 2022/0262185 Al Ellenbogen et al. (43) Pub. Date: Aug. 18, 2022 **Biometrics** IDENTITY DETERMINATION USING G07C 9/253 (2020.01); G07C 9/27 Applicant: Evolv Technologies, Inc., Walth MA (US) **United States** Patent Application Publication (10) Pub. No.: US 2017/0098161 A1 **Autonomous and Human** Ellenbogen et al. (43) Pub. Date: Apr. 6, 2017 AUGMENTED MACHINE DECISION MAKING **Assisted Decision Making** Applicant: Evolv Technologies, Inc., Walth **United States** Radar Imaging and Patent Application Publication (10) Pub. No.: US 2016/0291148 A1 (43) Pub. Date: Oct. 6, 2016 (10) Patent No.: US 10,541,472 B2 (12) United States Patent **Real-time Reconstruction** (54) BEAM FORMING WITH A PASSIVE FREQUENCY DIVERSE APERTURE (56 (12) United States Patent (10) Patent No.: US 10,725,153 B2 Applicant: Evolv Technologies, Inc. 13/89; G01S 15/89; G01S 7/04; G01: 3/888; G06T 5/04; G06T 15/08; G06' (71) Applicant: Evolv Technologies, Inc., Waltham MA (US)

Copyright 2018 Evolv Technologies, Inc.

- RF sensor suite built from the ground up
- Tracks objects and aggregates data over a 3D volume
- Proprietary real-time algorithms that pinpoint threats out of the crowd

Custom and multifaceted detection to bring screening to the speed of life

Electromagnetic Sensing

Electromagnetic Sensing

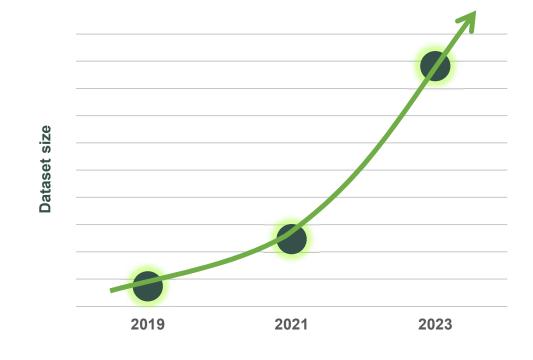

Computer Vision

lo

Continually expanding our training datasets

Further optimizing the RF spectrum

Re-packaging in new form factors

Computer Vision

ΙоΤ

Computer Vision

Optimizing the human/machine interaction via

- Positive identification of alarming individual
- Directed search of alarming object

Up to 6 cameras per system, synchronized directly to the EM sensors

Computer Vision

Electromagnetic Sensing

Computer Vision

Advancing depth perception and edge computation to explore

AI

Electromagnetic Sensing

Computer Vision

loT

The first-of-its-kind connected physical security fleet, and it's growing... *FAST*

Key

Detection & Operations

Digital & Integration

- Tablet Interface Improvements
- Alert Performance Improvements
- Wireless Tablets
- Motorola Integration

2021 1H

Evolv Insights[®]

- Gen 2 Algorithm
- Service Diagnostics
- Threat Alert Configuration
- Operations & Security Insights Dashboards
- Request Assistance Emergency Messaging

- Threat Resolution
 Video Analytic
- New Tablet Form Factors
- Video Management Integrations
- Mass Notification Integrations
- Screening Proactive Push Reports
- Alert Tag
 Customization

- Outdoor Ruggedized Mobility System
- Aggregated Alerts
- Unverified Alert VMS Integration
- Integration Open API
- Insights Data Query API
- Security Staff Performance Dashboard
- Service & Support Dashboard
