ProMIS Neurosciences Issues Narrated Overview of Second Quarter 2018 Results

TORONTO and CAMBRIDGE, MA, Aug. 29, 2018 /PRNewswire/ -ProMIS Neurosciences, Inc. (TSX: PMN; OTCQB: ARFXF), a biotechnology company focused on the discovery and development of antibody therapeutics targeting toxic oligomers implicated in the development of neurodegenerative diseases, today announced it has issued a narrated overview of second quarter 2018 operational results.

"We continued to make significant progress on three main priorities in the second quarter of 2018", stated ProMIS Executive Chairman, Eugene Williams. "First, to maintain PMN310 on track for clinical trial start in the second half of 2019 with initiation of cell line development supporting product manufacturing; second, to differentiate the oligomer selectivity of PMN310 as best in class profile for the treatment of Alzheimer's disease (AD) versus other, less selective amyloid-beta (Ab) directed therapies in development; and third, to expand our portfolio by developing therapeutic antibodies targeting toxic oligomers of alpha-synuclein for Parkinson's disease (PD) and toxic aggregates of Tau-DNA binding protein (TDP43) for ALS, with a view to partnering these assets."

The narrated overview can be found on the ProMIS Neurosciences website by clicking on the link below:

About ProMIS Neurosciences

ProMIS Neurosciences, Inc. is a development stage biotechnology company focused on discovering and developing antibody therapeutics targeting toxic oligomers implicated in the development and progression of neurodegenerative diseases, in particular Alzheimer's disease (AD), amyotrophic lateral sclerosis (ALS) and Parkinson's disease (PD). The Company's proprietary target discovery engine is based on the use of two complementary techniques. The Company applies its thermodynamic, computational discovery platform—ProMIS™ and Collective Coordinates — to predict novel targets known as Disease Specific Epitopes on the molecular surface of misfolded proteins. Using this unique precision medicine approach, the Company is developing novel antibody therapeutics for AD, ALS

and PD. ProMIS is headquartered in Toronto, Ontario, with offices in Cambridge, Massachusetts. ProMIS is listed on the Toronto Stock Exchange under the symbol PMN, and on the OTCQB Venture Market under the symbol ARFXF.
