Motus GI Reports Third Quarter 2019 Financial Results and Provides Corporate Update

- Pure-Vu® System launched in high value U.S. inpatient colonoscopy market with first commercial placements at early adopter hospitals completed in early-October
- Scaled commercial production and expanded the U.S. sales team with additional seasoned medical device sales professionals
- Management to hold an investor conference call today at 8:00 a.m. ET

FORT LAUDERDALE, Fla.--(BUSINESS WIRE)-- [Motus GI Holdings, Inc.](#), (NASDAQ: MOTS) ("Motus GI" or the "Company"), a medical technology company providing endoscopy solutions that improve clinical outcomes and enhance the cost-efficiency associated with the diagnosis and management of gastrointestinal conditions, today reported its financial results for the third quarter ended September 30, 2019 and provided a corporate update.

"I am excited by the building momentum of the business as we implement our commercial strategy and continued to deliver on several key milestones in the third quarter, including initiating sales and scaling production of the Pure-Vu® System, as well as expanding our U.S. sales team with additional seasoned medical device sales professionals," commented Tim Moran, Chief Executive Officer of Motus GI. "The gastroenterologists and support staff from our initial hospital placements are already reporting positive feedback regarding the Pure-Vu System, along with valuable real-world customer insights that will help us frame our broader U.S. roll-out."

"Our U.S. sales team is actively ramping up their activity, and as a result, our pipeline of high value target accounts is growing. Looking ahead, as the Pure-Vu System builds an installed base, we will rely on our systematic account activation program to drive utilization, which we believe will lead to growing sales of disposable sleeves. We believe that the long-term growth opportunity is centered around the revenue from disposable sleeves, as we gain U.S. customers and commercial utilization of the Pure-Vu System in the coming quarters," concluded Mr. Moran.

Progress Updates

The Company is initially focusing its launch of the Pure-Vu System in the high-value U.S. inpatient colonoscopy market. Inadequate bowel prep in the inpatient market directly affects patient outcomes and impacts the cost of care in a segment that is comprised of approximately 1.5 million annual procedures in the U.S. The Company is currently targeting larger hospital networks, where the average hospital conducts anywhere from 500 to more than 1,000 inpatient colonoscopy procedures per year. In October 2019, Motus GI initiated the first commercial placements of its Pure-Vu System as part of its initial U.S. market launch targeting early adopter hospitals. Since initiating commercial placements of the Pure-Vu System, the system is now being utilized in approximately **10** of the early adopter

hospitals. These placements followed the Company scaling of commercial production during the third quarter and receiving 510(k) clearance for the second-generation of the Pure-Vu System (the “GEN2 Pure-Vu System”) from the U.S. Food and Drug Administration (“FDA”) in June 2019.

To support the commercial roll-out of its Pure-Vu System, the Company continues to strengthen its sales organization with the addition of seasoned medical device sales professionals, strategically expanding its footprint and reach to key target hospital accounts that can become strong reference customers going forward.

In addition, with approximately four million annual in-patient colonoscopy procedures worldwide, the Company believes there are significant opportunities outside the U.S. The Company intends to seek CE Mark approval for the GEN2 Pure-Vu System (GEN1 already received CE Mark) as well as other regulatory approvals in key markets outside the U.S.

Motus GI remains committed to continuing to develop clinical evidence of the benefits of the Pure-Vu System in collaboration with leading investigators at world-class medical centers.

The EXPEDITE Study

In November, the Company announced that the Boston Medical Center has initiated the EXPEDITE study to evaluate the effectiveness of the Pure-Vu System on bowel preparation rates. This study will enroll up to 50 inpatients and 50 outpatients over a 12-month study period. The study will assess the ability of the Pure-Vu System to accelerate time to a successful colonoscopy in a real-world setting.

Near-Term Milestones Expected to Drive Value

- Ramp up commercial sales and marketing activities to engage hospitals and physician thought leaders to create key reference centers across the U.S.
- Announce approval for CE Mark registration of GEN2 Pure-Vu System
- Continue building an extensive intellectual property portfolio in key international territories to provide long-term protection for multiple key aspects of the Pure-Vu System
- Support additional sponsored and investigator initiated clinical studies and registries focused on demonstrating the Pure-Vu System’s ability to accelerate the time to a successful colonoscopy for inpatients, as well as high-risk outpatient populations at premier healthcare institutions; and
- Demonstrate clinical utility and health economic benefits through new peer-reviewed publications and presentations at key scientific conferences

Financial Results for the Quarter Ended September 30, 2019

For the three months ended September 30, 2019, the Company reported a net loss of approximately \$5.2 million, or a net loss per diluted share of \$0.18, compared to \$5.2 million, or a net loss per diluted share of \$0.33, for the same period last year. The third quarter of 2019 included non-cash expenses of approximately \$0.6 million principally related to stock-based compensation, compared to \$1.4 million of non-cash expenses for the same period of 2018.

For the nine months ended September 30, 2019, the Company reported a net loss of

approximately \$17.1 million, or a net loss per diluted share of \$0.72, compared to \$16.7 million, or a net loss per diluted share of \$1.13, for the same period last year. The nine months ended September 30, 2019 included non-cash expenses of approximately \$2.7 million principally related to stock-based compensation, compared to \$5.8 million of non-cash expenses for the same period of 2018.

The Company ended the quarter with approximately \$26.4 million in cash, cash equivalents and investments.

Conference Call:

The Motus GI management team has scheduled a conference call for today at 8:00 a.m. EST to discuss these results. To access the conference call, investors are invited to dial (877) 407-0792 (U.S. and Canada) or (201) 689-8263 (International). The conference ID number is 13696399. A live audio webcast can be accessed by visiting the investor relations section of the Company's website, www.motusgi.com. A replay of the webcast will be archived on the Motus GI website for 90 days following the event.

About Motus GI and the Pure-Vu® System

Motus GI Holdings, Inc. is a medical technology company, with subsidiaries in the U.S. and Israel, providing endoscopy solutions that improve clinical outcomes and enhance the cost-efficiency associated with the diagnosis and management of gastrointestinal conditions. The Company's flagship product is the Pure-Vu® System, a U.S. FDA cleared medical device indicated to help facilitate the cleaning of a poorly prepared colon during the colonoscopy procedure. The device integrates with standard and slim colonoscopes to enable safe and rapid cleansing during the procedure while preserving established procedural workflow and techniques. Challenges with bowel preparation for inpatient colonoscopy represent a significant area of unmet need that directly affects clinical outcomes and increases the cost of care in a market segment that comprises approximately 1.5 million annual procedures in the U.S. and approximately 4 million annual procedures worldwide. Motus GI believes the Pure-Vu® System may improve outcomes and lower costs for hospitals by reducing the time to successful colonoscopy, minimizing delayed and incomplete procedures, and improving the quality of an exam. In clinical studies to date, the Pure-Vu® System significantly increased the number of patients with an adequate cleansing level, according to the Boston Bowel Preparation Scale Score, a validated assessment instrument.
