Sonic Automotive, Inc. Reports 13% Overall Revenue Growth Used Vehicle Revenue up 28% First Quarter Profits Up Over Prior Year

CHARLOTTE, N.C., April 27 /PRNewswire-FirstCall/ -- Sonic Automotive, Inc. (NYSE: SAH), the nation's third-largest automotive retailer, today reported that 2010 first quarter adjusted earnings from continuing operations were \$0.14 per diluted share, up 40% from adjusted earnings from continuing operations of \$0.10 per diluted share in the prior year quarter. The adjustments, which are related primarily to debt refinancing activities and mark-to-market adjustments on interest rate swaps, are detailed further in the attached tables. During the quarter, the Company further strengthened its balance sheet by issuing \$200 million of senior subordinated notes to refinance a portion of its existing senior subordinated notes. This refinancing resulted in the Company incurring interest expense on both notes for a period of time prior to the existing notes being retired in early April.

Business Overview – Operating Initiatives Continue to Drive Revenue Growth

Commenting on the quarter B. Scott Smith, the Company's President, said, "We are very pleased with the way our operating initiatives continued to take hold this quarter. Our focus on associate satisfaction has led to all time low associate turnover which is resulting in better execution of our Playbook process. Commenting further, "We saw strong revenue growth in all departments which continues to demonstrate that our strategy is delivering sound performance as the automotive market continues to improve."

New and Used Vehicles – Revenue and Gross Profit Levels Up Dramatically

Overall new vehicle retail volume was up 10% and used vehicle retail volume was up 25% for the first quarter of 2010 compared to the same quarter last year. Jeff Dyke, the Company's EVP of Operations, stated, "The retail gross profit generated by our used vehicle department alone was up over 8% in the first quarter of 2010 compared to the same period last year. Our used vehicle business continues to exceed our expectations as our stores realize the power of our operational playbooks. Consistent with the expectation we communicated last quarter, our used vehicle margins have contracted somewhat compared to the first quarter of last year as a result of the significant volume growth. Sequentially, our used vehicle margins are in line with the last several quarters. It's important to remember as we continue to expand our penetration of the used vehicle market that our volume growth generates incremental gross profit dollars in used, F&I, and parts and service."

Parts and Service – Steady Growth in a Key Department; Gross margin up 70 basis

points

Sonic's parts and service revenue for the first quarter was up approximately 3% compared to the prior year quarter, while gross margin was up 70 basis points at 50.3%. Mr. Dyke stated, "Our parts and service business benefited from the improvement in the general economic environment, the work associated with the various manufacturer recalls during the period, and our continued rollout of our playbook for this area. We are still in the early stages of our operational plan for our fixed operations departments and expect to see continued revenue and margin growth over the course of the year."

Business Outlook

Scott Smith concluded his comments by noting, "The quarter got off to a slow start as our stores came out of a very strong December and as we continued investing in our associates, but profitability improved dramatically as we progressed through the quarter. I have said from the beginning that this is a people business and we will continue to invest appropriately in the one asset that will drive our future growth. We are on track to meet our profit targets for the year."

Presentation materials for the Company's April 27, 2010 earnings conference call at 11:00 A.M. (Eastern) can be accessed on the Company's website at www.sonicautomotive.com by clicking on the "For Investors" tab and choosing "Webcasts & Presentations" on the right side of the monitor.
