MAY 2026 INVESTOR PRESENTATION

DISCLAIMER – FORWARD LOOKING STATEMENTS & NON-GAAP DISCLOSURE

This presentation contains forward-looking statements that involve substantial risks and uncertainties. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), and Section 27A of the Securities Act of 1933, as amended (the “Securities Act”). In some cases, you can identify forward-looking statements by the words “anticipate,” “assume,” “believe,” “continue,” “could,” “estimate,” “expect,” “foreseeable,” “future,” “intend,” “may,” “might,” “objective,” “ongoing,” “plan,” “potential,” “predict,” “project,” “seek,” “should,” “will,” or “would” and/or the negative of these terms, or other comparable terminology intended to identify statements about the future. They appear in a number of places throughout this presentation and include statements regarding our intentions, beliefs or current expectations concerning, among other things, results of operations for the fiscal year ended December 31, 2025, our long-term leverage target, the estimated net tariff impact on Adjusted EBITDA, financial condition, liquidity, prospects, growth, strategies, the industry in which we operate and other information that is not historical information. These statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from the information expressed or implied by these forward-looking statements. Although we believe that we have a reasonable basis for each forward-looking statement contained in this presentation, we cannot assure you that we will achieve or realize these plans, intentions or expectations. Forward-looking statements are inherently subject to risks, uncertainties and assumptions that are difficult to predict or quantify.

Generally, statements that are not historical facts, including statements concerning our possible or assumed future actions, business strategies, events or results of operations, are forward-looking statements. Factors that could cause actual results to differ materially from those forward-looking statements included in this presentation include, among others: risks related to conditions that affect the commercial and business aviation industries; decreases in budget, spending or outsourcing by our military end-users; risks from any supply chain disruptions or loss of key suppliers; increased costs of labor, equipment, raw materials, freight and utilities due to inflation; future outbreaks and infectious diseases; risks related to competition in the market in which we participate; loss of an OEM authorization or license; risks related to a significant portion of our revenue being derived from a small number of customers; our ability to remediate effectively the material weaknesses identified in our internal control over financial reporting; our ability to respond to changes in GAAP; our or our third-party partners’ failure to protect confidential information; data security incidents or disruptions to our IT systems and capabilities; our ability to comply with laws relating to the handling of information about individuals; changes to United States tariff and import/export regulations; failure to maintain our regulatory approvals; risks relating to our operations outside of North America; failure to comply with government procurement laws and regulations; any work stoppage, hiring, retention or succession issues with our senior management team and employees; any strains on our resources due to the requirements of being a public company; risks related to our indebtedness; our success at managing the risks of the foregoing, and the other factors described in our Annual Report on Form 10-K for the year ended December 31, 2025 and our other filings with the SEC.

As a result of these factors, we cannot assure you that the forward-looking statements in this presentation will prove to be accurate. You should understand that it is not possible to predict or identify all such factors. We operate in a competitive and rapidly changing environment. New factors emerge from time to time, and it is not possible to predict the impact of all of these factors on our business, financial condition or results of operations.

Furthermore, if our forward-looking statements prove to be inaccurate, the inaccuracy may be material. In light of the significant uncertainties in these forward-looking statements, you should not regard these statements as a representation or warranty by us or any other person that we will achieve our objectives, plans or cost savings in any specified time frame or at all. In addition, even if our results of operations, financial condition and liquidity, and the development of the industry in which we operate, are consistent with the forward-looking statements contained in this presentation, those results or developments may not be indicative of results or developments in subsequent periods. We caution you not to place undue reliance on these forward-looking statements. All forward looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by the foregoing cautionary statements. Forward-looking statements speak only as of the date of this presentation. We do not undertake any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law. Comparisons of results for current and any prior periods are not intended to express any future trends or indications of future performance, unless expressed as such, and should only be viewed as historical data.

This presentation includes “non-GAAP financial measures,” which are financial measures that either exclude or include amounts that are not excluded or included in the most directly comparable measures calculated and presented in accordance with accounting principles generally accepted in the United States (“GAAP”), including Adjusted EBITDA, Adjusted EBITDA Margin, Net Debt to Adjusted EBITDA, and Free Cash Flow. We use these non-GAAP financial measures to evaluate our business operations.

Certain of the non-GAAP financial measures presented in this presentation are supplemental measures of our performance, in the case of Adjusted EBITDA and Adjusted EBITDA Margin, that we believe help investors understand our financial condition and operating results and assess our future prospects. We believe that presenting these non-GAAP financial measures, in addition to the corresponding GAAP financial measures, are important supplemental measures that exclude non-cash or other items that may not be indicative of or are unrelated to our core operating results and the overall health of our company. We believe that these non-GAAP financial measures provide investors greater transparency to the information used by management for its operational decision-making and allow investors to see our results “through the eyes of management.” We further believe that providing this information assists our investors in understanding our operating performance and the methodology used by management to evaluate and measure such performance. We also present Net Debt to Adjusted EBITDA and Free Cash Flow, which are liquidity measures, that we believe are useful to investors because it is also used by our management for measuring our operating cash flow, liquidity and allocating resources. We believe it is important to measure the free cash flows we have generated from operations, after accounting for routine capital expenditures required to generate those cash flows. When read in conjunction with our GAAP results, these non-GAAP financial measures provide a baseline for analyzing trends in our underlying businesses and can be used by management as one basis for financial, operational and planning decisions. Finally, these measures are often used by analysts and other interested parties to evaluate companies in our industry.

We define Adjusted EBITDA as net income (loss) before interest expense, income tax expense (benefit), depreciation and amortization, further adjusted for certain non-cash items that we may record each period, as well as non-recurring items such as acquisition costs, integration and severance costs, refinance fees, business transformation costs and other discrete expenses, when applicable. We define Adjusted EBITDA Margin as Adjusted EBITDA divided by revenue. We define organic revenue growth as revenue excluding the contributions from acquisitions that closed in the last twelve months. We believe that Adjusted EBITDA and Adjusted EBITDA Margin are important metrics for management and investors as they remove the impact of items that we do not believe are indicative of our core operating results or the overall health of our company and allows for consistent comparison of our operating results over time and relative to our peers. We define Net Debt to Adjusted EBITDA as long-term debt, less cash and cash equivalents divided by Adjusted EBITDA. We define free cash flow as cash from operating activities cash flows from investing activities excluding acquisitions.

Management recognizes that these non-GAAP financial measures have limitations, including that they may be calculated differently by other companies or may be used under different circumstances or for different purposes, thereby affecting their comparability from company to company. In order to compensate for these and the other limitations discussed below, management does not consider these measures in isolation from or as alternatives to the comparable financial measures determined in accordance with GAAP. Readers should review the reconciliations of our non-GAAP financial measures to the corresponding GAAP measures included in this presentation and should not rely on any single financial measure to evaluate our business.

We define Adjusted EBITDA as net income (loss) before interest expense, income tax expense (benefit), depreciation and amortization, further adjusted for certain non-cash items that we may record each period, as well as non-recurring items such as acquisition costs, integration and severance costs, refinance fees, business transformation costs and other discrete expenses, when applicable. We define Adjusted EBITDA Margin as Adjusted EBITDA divided by revenue. We believe that Adjusted EBITDA and Adjusted EBITDA Margin are important metrics for management and investors as they remove the impact of items that we do not believe are indicative of our core operating results or the overall health of our company and allows for consistent comparison of our operating results over time and relative to our peers.

We have presented forward-looking statements regarding Adjusted EBITDA, Adjusted EBITDA Margin and Free Cash Flow. These non-GAAP financial measures are derived by excluding certain amounts, expenses or income, from the corresponding financial measure determined in accordance with GAAP. The determination of the amounts that are excluded from this non-GAAP financial measure is a matter of management judgment and depends upon, among other factors, the nature of the underlying expense or income amounts recognized in a given period in reliance on the exception provided by item 10(e)(1)(i)(B) of Regulation S-K. We are unable to present a quantitative reconciliation of each of forward-looking Adjusted EBITDA, Adjusted EBITDA Margin and Free Cash Flow to its most directly comparable forward-looking GAAP financial measure because such information is not available, and management cannot reliably predict the necessary components of such GAAP measure without unreasonable effort or expense. In addition, we believe such reconciliations would imply a degree of precision that would be confusing or misleading to investors. The unavailable information could have a significant impact on the company’s future financial results. These non-GAAP financial measures are preliminary estimates and subject to risks and uncertainties, including, among others, changes in connection with quarter-end and year-end adjustments. Any variation between the Company’s actual results and preliminary financial data set forth above may be material.

STANDARD AERO AT A GLANCE

THE LEADING INDEPENDENT AEROENGINE AFTERMARKET SERVICES PROVIDER

Pure Play Focus on the Aeroengine Aftermarket

~80% of Revenue from Platforms with #1 or #2 Market Positions¹

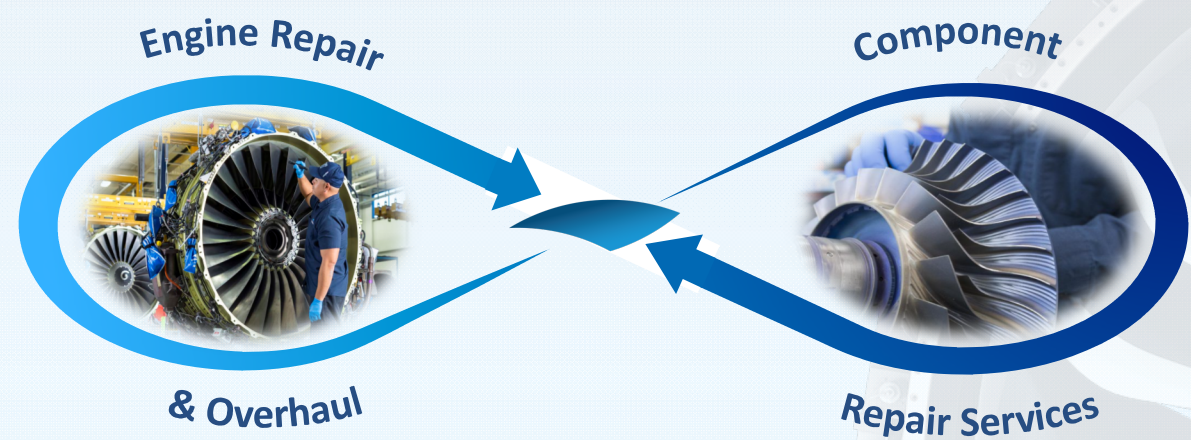

~77% of Revenue from Customers with Long-Term Agreements²

First Independent LEAP Premier MRO Provider in the Americas

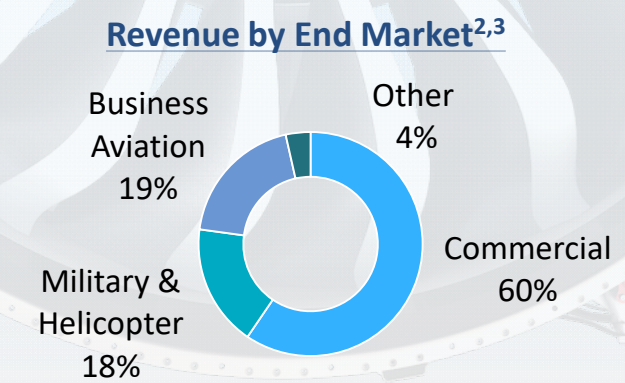

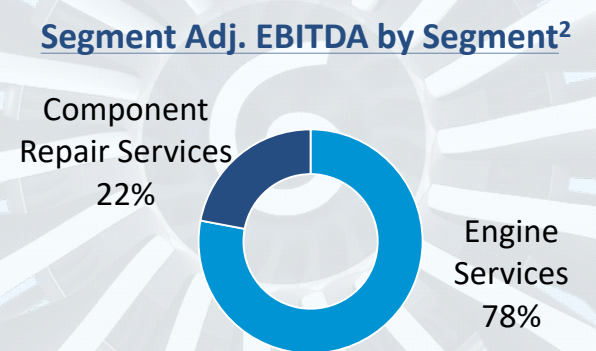

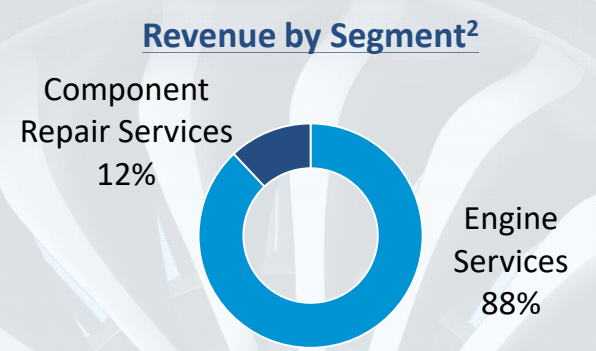

Global Footprint Across 50+ Sites and 6 Continents

Platform for Synergistic M&A

Leading Capabilities Serving the Aeroengine Aftermarket

Attractive Business Mix

Key Partner to Both OEMs and Operators

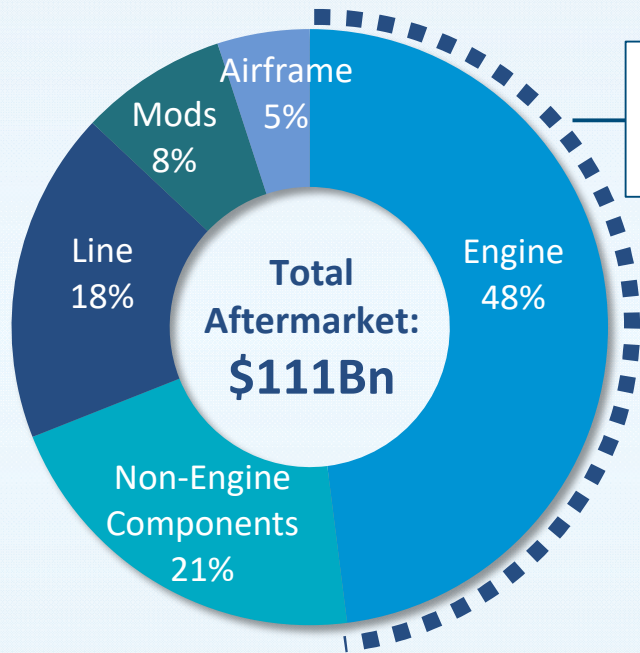

1. Company estimates; reflects % of 2025 Engine Services revenue
 2. Based on FY 2025 results

3. Reflects revenue mix across entire business with Component Repair Services allocated across end markets

Critical Partnership Role

Connecting OEMs and Operators

- ✓ Outsourcing allows OEMs to focus on developing engines
- ✓ Expands OEM network of aftermarket support
- ✓ Improves customer satisfaction via better service / TAT
- ✓ Mitigates market & margin erosion from non-OEM parts

- ✓ Often want creative, customized solutions
- ✓ Superior attention, service and performance
- ✓ Offer cross-OEM/platform services and bundling
- ✓ Access to competitive pricing from USM and repairs

APPENDIX

RECONCILIATION OF NON-GAAP FINANCIAL METRICS

ADJUSTED EBITDA AND ADJUSTMENTS WALK

	Three Months Ended March 31,	
	2026	2025
	<i>(in millions, except percentages)</i>	
Net income	\$79.9	\$62.9
Income tax expense	25.0	22.2
Depreciation and amortization	46.5	48.7
Interest expense	38.2	43.8
Business transformation costs (LEAP and CFM) ⁽¹⁾	6.6	12.9
Non-cash stock compensation expense	3.5	—
Integration costs and severance ⁽²⁾	0.3	2.0
Secondary offering costs ⁽³⁾	1.3	1.4
Other ⁽⁴⁾	1.9	4.3
Adjusted EBITDA	\$203.2	\$198.2
Revenue	\$1,626.9	\$1,435.6
Net income margin	4.9%	4.4%
Adjusted EBITDA Margin	12.5%	13.8%

Note: Figures may not sum due to rounding

- 1) Represents new product industrialization costs with the business transformation of the LEAP 1A/1B engine line in San Antonio, Texas and the expansion of the Company's CFM56 capabilities into Dallas, Texas.
- 2) Represents integration costs incurred, including any facility or platform consolidation associated with the integration of an acquisition that does not meet capitalization criteria and severance related to reduction in workforce or acquisitions. Examples of integration costs may include lease breakage or run-off fees, consulting costs, demolition costs or training costs.
- 3) Represents transaction costs incurred in connection with completed acquisitions, including legal and professional fees, debt arrangement fees and other third-party costs.
- 4) Represents other non-recurring costs including professional fees related to business transformation and quarterly management fees payable to Carlyle Investment Management L.L.C. and Beamer Investment Inc. under consulting services agreements, representation and warranty insurance costs associated with acquisitions, and other non-comparable events to measure operating performance as these events arise outside of the Company's ordinary course of continuing operations.
