

## Company Overview

NeuBase Therapeutics, Inc. is developing its modular peptide-nucleic acid antisense oligonucleotide (PATrOL™) platform to address genetic diseases caused by mutant proteins with a single, cohesive approach. The systemically-deliverable PATrOL therapies have the potential to improve upon current gene silencing treatments by combining the advantages of synthetic approaches with the precision of antisense technologies. NeuBase intends to use its platform to address repeat expansion disorders, with an initial focus on Huntington's disease and myotonic dystrophy, as well as a variety of other genetic disorders.
