

Marathon Patent Group's Wholly-Owned Subsidiary CyberFone Systems, LLC Enters Into Settlement and License Agreement With Ricoh Company, LTD.

LOS ANGELES, CA -- (Marketwired) -- 07/15/15 -- **Marathon Patent Group, Inc.** (NASDAQ: MARA) ("Marathon"), a patent licensing company, announced today that its wholly-owned subsidiary, CyberFone Systems, LLC ("CyberFone"), has entered into a settlement and license agreement with Ricoh Company, LTD ("Rico"). The consideration to be paid by Ricoh to CyberFone and all other terms of the license agreement are confidential.

CyberFone previously asserted infringement relating to U.S. Patent 6,044,382. The portfolio, which has a large and established licensing base, consists of ten United States patents and 27 foreign patents and one patent pending. The patent rights that cover digital communications and data transaction processing are foundational to certain applications in the wireless, telecommunications, financial and other industries. The portfolio cites and has been cited in patents owned by IBM, Cisco, Hitachi, Siemens, NEC and in at least 437 other patents issued or pending in the United States.

Dr. Rocco Martino, inventor and President of CyberFone Systems, is today responsible for more than 42 patented inventions, many in the data processing and computer transaction fields. On behalf of Dr. Martino, Marathon's CyberFone Systems has executed over 40 settlement and license agreements protecting his patented inventions.

Doug Croxall, Chief Executive Officer of Marathon, stated, "We're pleased with the continued success of our licensing campaign with Dr. Martino. In an age when individual inventors are seeing their constitutionally protected rights eroded by larger companies utilizing their disparate financial resources to twist the patent system and choosing to pursue the unauthorized use of the patents, as opposed to paying a reasonable royalty, we will continue to stand up with and for them."

"Dr. Martino, and those like him are incredibly valuable to inventors, innovators and the American economy," said Mr. Croxall. "It is important to recognize him, especially in light of the continuing anti-patent assertion/New Economic Policy rhetoric coming from the Executive and Legislative branches of our government."
