Datavault AI Announces Strategic and Operational Objectives for 3Q 2025

Strategy Includes Utilization of NYIAX Assets to Deploy and Brand Elements, NIL, and Political Stable Coin Platforms

Genius ACT passage in U.S. Congress material to potential timing of regulatory compliant first trade on compliant stable coin exchanges

NEW YORK--(BUSINESS WIRE)-- **Datavault AI Inc. (NASDAQ: DVLТ)**, a pioneer in AI-driven blockchain and data monetization, today announced objectives for the third quarter 2025. The announcement is part of a new discipline of establishing quarterly objectives and reporting on the progress of those objectives to enable the Company's stockholders to track the Company's building and execution of its strategy which includes;

- Completion of all planned strategic 2025 acquisitions within Acoustic and Data divisions providing avenues for our strategic growth
- Brand and launch new International Elements Exchange, International NIL Exchange, and American Politics Exchange leveraging cutting-edge Web 3.0 technologies and high-performance computing systems developed by Datavault AI.
- Execution of a Super Computer and AI Development Strategy for 2026 and longer term.

Datavault AI's patented Datavalue® and DataScore® agentic software, developed with engineering and software productization teams at IBM WatsonX. This quarter, upon our team's execution will focus on the exploitation of new patented technology union with NYIAX the Web 3.0 enabled Nasdaq financial framework Datavault AI recently secured through an exclusive license. Additionally, the Information Data Exchanges will be redesigned to enable secure data trading within the same advanced architecture to provide greater scale and reach for Datavault AI global solutions.

Commented Nathaniel T. Bradley, CEO of DataVault AI, "We have an ambitious set of objectives for the upcoming quarter and second half of 2025. We've been working very diligently to assemble an unparalleled set of businesses and assets for a company our size that is intended to enable us to be a leader through various groundbreaking initiatives and solidifying our position as a leader in AI-driven financial technologies related to data monetization, stable and utility coin minting and Sumerian® Web 3.0 anchoring." Added Bradley: "We have 3 key objectives for the quarter, they are: (a) the establishment of certain innovative 'marketplaces' or 'platforms' to enable the trading of certain innovative stablecoins; (b) establishment of high performance computing and AI development strategy execution (c) the completion of all key strategic acquisitions for the entirety of 2025."

The primary priority for Datavault AI's Q3, will be for the quarter to establish and launch a set of new digital asset platforms that if permitted, will leverage cutting-edge Web 3.0 technologies. A close second and equally as important to our measurement of success is

our high-performance supercomputing initiative, that will be powered by Datavault AI's patented DataValue and DataScore software, developed with engineering and software productization teams at IBM WatsonX. Additionally, the Information Data Exchange will be redesigned to enable secure data trading within the same advanced architecture.

Key patents that are expected to support the Company's efforts include, over 70 unique portfolio holdings and are not limited to a growing portfolio of U.S. and Internationally patents issued, pending and in development, Sumerian Anchors for secure blockchain-based commodity and artifact trading, with specialty in acoustics, DataValue and DataScore for AI-powered valuation and monetization, and NYIAX's blockchain exchange technology make for a diversified portfolio.

"We are entering the next era of digital and data innovation—one that demands trust and a secure, transparent, and automated economy for digital asset trading," said Teri Gallo, CEO of NYIAX. "Datavault AI, NYIAX, and our collective partners are uniquely positioned to deliver the infrastructure required to enable this vision and support the trading of tokenized digital assets across sectors."

The Company plans to actively engage with regulatory authorities to secure the necessary guidance and approval well in advance of the launch of these platforms. Ultimately, the Company's objectives are to facilitate trading of Geo Thermal energy, carbon credits, gold, silver, diamonds, lithium, and rare earth elements in a pre-mining production state, ensuring transparency and efficiency.

Update on Potential U.S. Regulatory Changes

The GENIUS Act has passed the Senate and is awaiting House action, with a potential vote in late July 2025. The STABLE Act has cleared the House Financial Services Committee but awaits a full House vote. The House must decide whether to adopt the Senate's bill, pass its own, or reconcile the two, with key differences in regulatory strictness and scope. The outcome hinges on negotiations in the coming weeks, with significant implications for stablecoin regulation and the U.S. digital asset ecosystem.

About Datavault AI Inc.

Datavault AI (Nasdaq: DVLТ) is leading the way in AI experience, valuation and monetization of assets in the Web 3.0 environment. The company's cloud-based platform provides comprehensive solutions with a collaborative focus in its Acoustic Science and Data Science Divisions. Datavault AI's Acoustic Science Division features WiSA®, ADIO® and Sumerian® patented technologies and industry-first foundational spatial and multichannel wireless HD sound transmission technologies with IP covering audio timing, synchronization and multichannel interference cancellation. The Data Science Division leverages the power of Web 3.0 and high-performance computing to provide solutions for experiential data perception, valuation and secure monetization. Datavault AI's agentic platform serves multiple industries through patented DataValue®, DataScore® and Data Vault Bank®, including HPC software licensing for sports & entertainment, events & venues, biotech, education, fintech, real estate, healthcare, energy and more. The Information Data Exchange® (IDE) enables Digital Twins, licensing of name, image and likeness (NIL) by securely attaching physical, real-world objects to immutable metadata objects, fostering responsible AI with integrity. Datavault AI's technology suite is completely customizable and

offers AI and Machine Learning (ML) automation, third-party integration, detailed analytics and data, marketing automation and advertising monitoring. The company is headquartered in Beaverton, OR. Learn more about Datavault AI at www.dvlt.ai.
