Tego Cyber Inc. CEO Shannon Wilkinson to be Featured Today on Bloomberg Radio

LAS VEGAS, NV / ACCESSWIRE / June 9, 2021 Tego Cyber Inc. (OTCQB:TGCB), an emerging developer of proactive cyber threat intelligence applications and solutions, today announced that Shannon Wilkinson, Chief Executive Officer and Chief Financial Officer of Tego Cyber, will be a guest today, June 9, 2021, on Bloomberg Radio at approximately 10:30 a.m. EST with Paul T. Sweeney and Matt Miller. Mrs. Wilkinson will be discussing the Company's technology and its Tego Threat Intelligence Platform as well as the rise in cyber and ransomware attacks around the country. Bloomberg Markets AM Radio is on weekdays from 10am-12pm EST.

Paul Sweeney and Matt Miller focus on market coverage as Wall Street begins its day, with analysis from Bloomberg Opinion writers, Bloomberg Intelligence analysts, and influential newsmakers.

The Tego Threat Intelligence Platform takes in vetted and curated threat data and after utilizing a proprietary process, the platform compiles, analyzes, and then delivers that data to an enterprise network in a format that is timely, informative, and relevant. The threat data provides additional context including specific details needed to identify and counteract threats so that security teams can spend less time searching for disparate information.

The Tego Cyber Threat Intelligence Platform provides context on threats in the customer's environment through its integrated, aggregated real-time threat feed. In today's world, real-time updates in addition to context are crucial as threat vectors are changing constantly.

About Tego Cyber Inc.

Tego Cyber Inc. (OTCQB:TGCB, "the Company") was created to capitalize on the emerging cyber threat intelligence market. The Company has developed a cyber threat intelligence application that integrates with top end security platforms to gather, analyze, then proactively identify threats to an enterprise network. The Tego Threat Intelligence Platform (TTIP) takes in vetted and curated threat data and after utilizing a proprietary process, the platform compiles, analyzes, and then delivers that data to an enterprise network in a format that is timely, informative, and relevant. The threat data provides additional context including specific details needed to identify and counteract threats so that security teams can spend less time searching for disparate information. The first version of the TTIP will integrate with the widely accepted SPLUNK platform to provide real-time threat intelligence to macro enterprises using the SPLUNK architecture. The Company plans on developing future versions of the TTIP for integration with other established SIEM systems and platforms including: Elastic, IBM QRadar, AT&T Cybersecurity, Exabeam, and Google Chronical.
