About Relmada Therapeutics, Inc.

Relmada Therapeutics is a clinical-stage, publicly traded specialty pharmaceutical company developing novel versions of proven drug products together with new chemical entities that potentially address areas of high unmet medical need in the treatment of pain. The Company has a diversified portfolio of four lead products at various stages of development including d-Methadone, its N-methyl-D-aspartate (NMDA) receptor antagonist for neuropathic pain; MepiGel, its orphan drug designated topical formulation of the local anesthetic mepivacaine; BuTab, its oral dosage form of the opioid analgesic buprenorphine; and LevoCap ER, its abuse resistant, sustained release dosage form of the opioid analgesic levorphanol. The Company's product development efforts are guided by the internationally recognized scientific expertise of its research team. The Company's approach is expected to reduce clinical development risks and costs while potentially delivering valuable products in areas of high unmet medical needs.
