

Buchardt Audio's Anniversary 10 Active Wireless Speakers Earn WiSA HT Interoperability Certification

Association member's latest speakers culminate ten years of innovation and feature WiSA HT technology for best-in-class wireless multichannel audio capabilities

SAN JOSE, Calif.--(BUSINESS WIRE)-- [WiSA Association](#), a subsidiary of WiSA Technologies, Inc. (NASDAQ: WISA), announced today that Association member Buchardt Audio's [Anniversary 10 \(A10\) Active Wireless Speakers](#) have earned WiSA Home Theater (HT) Interoperability Certification. The new speaker offering celebrates the tenth anniversary of Buchardt Audio and represents the brand's third WiSA Certified speaker line.

The A10 speakers utilize [WiSA HT](#) technology, allowing them to receive

uncompressed, 24-bit 48/96 kHz sound over a multichannel wireless network created by a WiSA Certified transmitter and speakers. To earn the mark of WiSA HT Interoperability Certification, products undergo rigorous testing ensuring they produce the high-definition, world-class, multichannel audio that WiSA products are known for.

"The A10 speakers combine our best innovations achieved in ten years of Buchardt Audio. This is a momentous product made even better with WiSA HT Interoperability Certification," said Mads Buchardt, CEO of Buchardt Audio. "As a dedicated member of the WiSA Association, we understand the impact their certifications have on the functionality and interoperability of our products and the industry as a whole. We are proud to add yet another speaker offering to Buchardt's growing line of WiSA-capable products."

With a focus on high-end loudspeakers, Buchardt Audio has taken the best implementations from years of product development to create the unique A10 Active Wireless Speakers. The speakers utilize the Buchardt RFA19 Tweeter, a new solution that uses small, aluminum domes to increase the resonance peak up to 30.000hz without impacting sound quality or clarity. Additionally, the A10 speakers are formulated with the high-quality Danish Purifi woofer, which employs ultra-low distortion and a compact small-cone, long-stroke driver to deliver clear, complex sound without the typical drawbacks of similar models. These engineering elements, in combination with sophisticated solid wood cabinets and WiSA HT technology, make the A10 Active Wireless Speakers the epitome of style, quality and functionality.

"We are excited to welcome Buchardt's latest speakers to the growing roster of WiSA

Certified products,” said Tony Ostrom, WiSA President. “The flawless engineering and design of the Anniversary 10 speakers perfectly showcase the capabilities of WiSA HT technology. Buchardt Audio is a valued Association member consistently focused on delivering innovative, high-quality HiFi products, and these speakers are no exception.”

The Buchardt A10 Active Wireless Speakers, along with other WiSA Certified products, will be showcased at the upcoming CEDIA Expo in Denver, CO on September 7-9 at WiSA’s booth, booth #4320.
