Veritone has been selected by the U.S. Department of Justice (DOJ) for a \$15 million Blanket Purchase Agreement, allowing all DOJ agencies to easily purchase Veritone software and services. Veritone will provide AI-powered software and professional services to rapidly transcribe, translate, locate, redact and extract critical evidence during early case assessment. (Graphic: Business Wire)

"This agreement provides streamlined DOJ purchasing capabilities across Veritone's AI-powered solutions, with the potential for future collaboration across the DOJ," said Jon Gacek, General Manager of Veritone's Public Sector business unit. "Our Public Sector solutions allow personnel to be significantly more productive as they investigate, review and redact a massive amount of

unstructured data, including digital documents, audio and video files. In addition, the agreement further underpins our ability to provide trusted software solutions for a growing number of government-related workflows and applications."

This agreement follows the 2021 announcement detailing the expanded availability of

aiWARE for all agencies of the DOJ, based on its enterprise-wide ATO (Authority to Operate) from the [FedRAMP authorization board](#) for its aiWARE Government platform deployed on both Microsoft Azure Government and AWS GovCloud environments. Historically, the DOJ has been procuring the Veritone solutions through Solutions for Enterprise-Wide Procurement contracts on an agency-by-agency basis.

Additionally, the DOJ can leverage Veritone partners, including Deloitte, CACI, PAE, and Leidos, each of which holds a position on the DOJ's \$1.5 billion automated litigation support contract. Veritone's relationships with these key partners provide the DOJ with access to Veritone's world-class AI technology and services for task orders placed under the \$1.5 billion contract as well.

Built for justice systems, law enforcement, and intelligence agencies, [Veritone's Public Sector solutions](#) rapidly extract actionable intelligence from large volumes of data, including video and audio evidence from dash cameras, body cameras, CCTV, and interview rooms, as well as other sources used in investigations, surveillance, and criminal justice.
