Corbus Pharmaceuticals Reports 2015 First Quarter Financial Results and Provides Business Update

First Quarter Marked by Significant Progress on Operational, Clinical and Regulatory Milestones

Company Expects to Commence Phase 2 Clinical Studies of Resunab in Scleroderma in 2Q 2015 and Cystic Fibrosis in 3Q 2015

NORWOOD, MA -- (Marketwired) -- 05/13/15 -- [Corbus Pharmaceuticals Holdings, Inc.](#) (NASDAQ: CRBP) (the "Company"), a clinical stage drug development company targeting rare, life-threatening chronic inflammatory and fibrotic diseases, announced today its financial results for the quarter ended March 31, 2015.

The Company also provided an update to its corporate progress and the clinical status for [Resunab](#)[™], its novel synthetic oral drug for the treatment of chronic inflammation and fibrosis associated with [cystic fibrosis](#) ("CF"), [diffuse cutaneous systemic sclerosis](#) ("scleroderma") and other chronic inflammatory-fibrotic diseases.

Recent Corporate Highlights

- Received a \$5 million development award from Cystic Fibrosis Foundation Therapeutics ("CFFT") to advance Resunab into a Phase 2 clinical trial for CF;
- Commenced trading of the Company's common stock on The Nasdaq Capital Market under ticker symbol CRBP;
- Submitted an Investigational New Drug ("IND") application to the U.S. Food and Drug Administration ("FDA") for a Phase 2 clinical trial of Resunab in 70 adults with CF;
- Received clearance from the FDA to initiate Phase 2 clinical trial with Resunab in 36 individuals with diffuse cutaneous systemic sclerosis; and
- Presented positive data demonstrating that Resunab significantly decreases fibrotic response and exerts potent anti-fibrotic effects in a preclinical model of lung fibrosis.

"I am very pleased with the progress and milestones achieved so far in 2015," stated Yuval Cohen, Ph.D., Chief Executive Officer of the Company. "Moving forward, we are committed to adding to this positive momentum and believe Resunab has the potential to be an impactful therapy for individuals suffering from these rare chronic inflammatory and fibrotic diseases."

Expected Near-Term Milestones

- Initiate the Phase 2 clinical study of Resunab for the treatment of scleroderma in the second quarter of 2015;
- Launch the Phase 2 study of Resunab for the treatment of CF in the next 90 days, pending FDA clearance of the IND and the clinical protocol;
- File for an EU Investigational Medicinal Products authorization for Resunab with the European Medicines Agency in the third quarter of 2015;
- File the Resunab application for U.S. and European Orphan Drug Designation for the treatment of both CF and scleroderma in the third quarter of 2015; and
- Present additional data at upcoming peer-reviewed scientific conferences on the biological properties of Resunab and its unique mechanism of action for resolving inflammation in CF.

Summary of Financial Results for First Quarter 2015

For the quarter ended March 31, 2015, the Company reported a net loss of approximately \$1,536,000, or a net loss per diluted share of \$0.06, compared to a net loss of approximately \$116,000, or a net loss per diluted share, of \$0.02 for the quarter ended March 31, 2014. The increase in the net loss for the quarter ended March 31, 2015 is attributable to a ramp up of the Company's operations to support the upcoming clinical trials in scleroderma and cystic fibrosis and the costs associated with being a public company. The Company ended the quarter with approximately \$4,972,000 of cash and cash equivalents.

About Resunab[™]

Resunab[™] is a novel synthetic oral drug with unique activity that has been shown to resolve inflammation and pro-fibrotic processes. Pre-clinical models and Phase 1 clinical studies have shown Resunab to have a favorable safety profile coupled with promising potency in pre-clinical models of inflammation and fibrosis. Resunab binds to the CB2 receptor on immune cells in the periphery and triggers resolution of inflammation and reduction of pro-inflammatory pathways, in effect turning chronic inflammation "off" without causing immunosuppression.

About Corbus Pharmaceuticals

Corbus Pharmaceuticals is a clinical stage pharmaceutical company focused on the development and commercialization of novel therapeutics to treat rare life-threatening inflammatory and fibrotic diseases. Our lead product candidate Resunab[™] is a novel oral drug that resolves chronic inflammation and pro-fibrotic processes. Resunab is scheduled to commence Phase 2 clinical trials for the treatment of cystic fibrosis and diffuse cutaneous systemic sclerosis (scleroderma) in 2015.
