MIAMI, Nov. 08, 2018 (GLOBE NEWSWIRE) -- Norwegian Cruise Line Holdings Ltd. (NYSE: NCLH) (together with NCL Corporation Ltd., "Norwegian Cruise Line Holdings", "Norwegian" or the "Company") today reported financial results for the third quarter ended September 30, 2018, as well as provided guidance for the fourth quarter and full year 2018.

Highlights

- The Company generated GAAP net income of \$470.4 million or EPS of \$2.11 compared to \$400.7 million or \$1.74 in the prior year. Adjusted Net Income was \$506.4 million or Adjusted EPS of \$2.27 compared to \$427.0 million or \$1.86 in the prior year. Adjusted EPS outperformed guidance by \$0.07.
- Total revenue increased 12.5% to \$1.9 billion. Gross Yield increased 4.5%. Net Yield increased 4.0% on a Constant Currency basis, outperforming guidance by 50 basis points.
- The Company expects to generate record earnings in full year 2018 and has increased its outlook above the high-end of its previous guidance range. Adjusted EPS is now expected to be approximately \$4.85, which is inclusive of the previously announced impact from itinerary optimization initiatives which will benefit future periods.

"Our three brands fully benefited from strong demand for peak summer season sailings, with particular strength in premium-priced itineraries in Alaska and Europe, resulting in the highest quarterly revenue and earnings in our history," said Mark A. Kempa, executive vice president and chief financial officer. "As 2018 winds down, our earnings outlook improves as we increase our full year Adjusted EPS above the high-end of our previous guidance range."

Third Quarter 2018 Results

GAAP net income was \$470.4 million or EPS of \$2.11 compared to \$400.7 million or \$1.74 in the prior year. The Company generated Adjusted Net Income of \$506.4 million or Adjusted EPS of \$2.27 compared to \$427.0 million or \$1.86 in the prior year.

Revenue increased 12.5% to \$1.9 billion compared to \$1.7 billion in 2017. Net Revenue increased 11.8% to \$1.4 billion compared to \$1.3 billion in 2017. These improvements were primarily attributed to strong organic pricing growth across all core markets along with an increase in Capacity Days due to the addition of Norwegian Bliss to the fleet in the second quarter of 2018. Gross Yield increased 4.5% and Net Yield increased 4.0% on a Constant Currency basis and 3.9% on an as reported basis.

Total cruise operating expense increased 10.8% in 2018 compared to 2017 primarily due to the aforementioned increase in Capacity Days. Gross Cruise Costs per Capacity Day increased 4.0% due to higher marketing, general and administrative expenses. Adjusted Net Cruise Cost Excluding Fuel per Capacity Day increased 2.0% on a Constant Currency basis and 2.1% on an as reported basis.

Fuel price per metric ton, net of hedges increased to \$510 from \$476 in 2017. The Company reported fuel expense of \$99.6 million in the period.

Interest expense, net was \$69.5 million in 2018 compared to \$66.3 million in 2017. The increase in interest expense reflects additional debt in connection with the delivery of Norwegian Bliss in the second quarter of 2018, Project Leonardo financing, as well as higher interest rates due to an increase in LIBOR. The increase in interest expense was partially offset by the benefits from the October 2017 full redemption of our 4.625% Senior Notes due 2020 and the April 2018 \$135.0 million partial redemption of our 4.75% Senior Notes due 2021.

Company Outlook

“The robust booking environment for cruise vacations is alive and well as evidenced by our stellar booked position for 2019, which continues to exceed this year’s record levels, with booking momentum accelerating for sailings throughout 2019 and extending into 2020,” said Frank Del Rio, president and chief executive officer of Norwegian Cruise Line Holdings Ltd. “We are well-positioned to achieve the three-year double-digit Adjusted EPS CAGR, net leverage and Adjusted ROIC targets provided at our 2018 Investor Day, while at the same time returning meaningful capital to shareholders, despite rising fuel prices and fluctuations in foreign exchange rates.”

2018 Guidance and Sensitivities

In addition to announcing the results for the third quarter, the Company also provided guidance for the fourth quarter and full year 2018, along with accompanying sensitivities. The Company does not provide guidance on a GAAP basis because the Company is unable to predict, with reasonable certainty, the future movement of foreign exchange rates or the future impact of certain gains and charges. These items are uncertain and will depend on several factors, including industry conditions, and could be material to the Company’s results computed in accordance with GAAP. The Company has not provided reconciliations between the Company’s 2018 guidance and the most directly comparable GAAP measures because it would be too difficult to prepare a reliable U.S. GAAP quantitative reconciliation without unreasonable effort.

Non-GAAP Financial Measures

We use certain non-GAAP financial measures, such as Net Revenue, Net Yield, Net Cruise Cost, Adjusted Net Cruise Cost Excluding Fuel, Adjusted Net Income, Adjusted EPS and Adjusted EBITDA, to enable us to analyze our performance. We refer you to "Terminology" above for the definitions of these and other non-GAAP financial measures. We utilize Net Revenue and Net Yield to manage our business on a day-to-day basis and believe that they are the most relevant measures of our revenue performance because they reflect the revenue we earned net of significant variable costs. In measuring our ability to control costs in a manner that positively impacts net income, we believe changes in Net Cruise Cost and Adjusted Net Cruise Cost Excluding Fuel to be the most relevant indicators of our performance.

As our business includes the sourcing of passengers and deployment of vessels outside of the U.S., a portion of our revenue and expenses are denominated in foreign currencies, particularly British pound, Canadian dollar, euro and Australian dollar, which are subject to fluctuations in currency exchange rates versus our reporting currency, the U.S. dollar. In order to monitor results excluding these fluctuations, we calculate certain non-GAAP measures on a Constant Currency basis, whereby current period revenue and expenses denominated in foreign currencies are converted to U.S. dollars using currency exchange rates of the comparable period. We believe that presenting these non-GAAP measures on both a reported and Constant Currency basis is useful in providing a more comprehensive view of trends in our business.

We believe that Adjusted EBITDA is appropriate as a supplemental financial measure as it is used by management to assess operating performance. We also believe that Adjusted EBITDA is a useful measure in determining our performance as it reflects certain operating drivers of our business, such as sales growth, operating costs, marketing, general and administrative expenses and other operating income and expense. Adjusted EBITDA is not a defined term under GAAP nor is it intended to be a measure of liquidity or cash flows from operations or a measure comparable to net income, as it does not take into account certain requirements such as capital expenditures and related depreciation, principal and interest payments and tax payments and it includes other supplemental adjustments.

Adjusted Net Income and Adjusted EPS are non-GAAP financial measures that exclude certain amounts and are used to supplement GAAP net income and EPS. We use Adjusted Net Income and Adjusted EPS as key performance measures of our earnings performance. We believe that both management and investors benefit from referring to these non-GAAP financial measures in assessing our performance and when planning, forecasting and analyzing future periods. These non-GAAP financial measures also facilitate management's internal comparison to our historical performance. In addition, management uses Adjusted EPS as a performance measure for our incentive compensation. The amounts excluded in the presentation of these non-GAAP financial measures may vary from period to period; accordingly, our presentation of Adjusted Net Income and Adjusted EPS may not be indicative of future adjustments or results. For example, for the nine months ended September 30, 2018, we incurred \$6.3 million related to the extinguishment of debt due to the partial redemption of our 4.750% Senior Notes due 2021. We included this as an adjustment in the reconciliation of Adjusted Net Income since the extinguishment of debt is not representative of our day-to-day operations and we have included similar adjustments in prior periods; however, this adjustment did not occur in the comparable prior period or the three months ended September 30, 2018, each of which is presented in this release and this adjustment is therefore not included in the reconciliation for these periods.

You are encouraged to evaluate each adjustment used in calculating our non-GAAP financial measures and the reasons we consider our non-GAAP financial measures appropriate for supplemental analysis. In evaluating our non-GAAP financial measures, you should be aware that in the future we may incur expenses similar to the adjustments in our presentation. Our non-GAAP financial measures have limitations as analytical tools, and you should not consider these measures in isolation or as a substitute

for analysis of our results as reported under GAAP. Our presentation of our non-GAAP financial measures should not be construed as an inference that our future results will be unaffected by unusual or non-recurring items. Our non-GAAP financial measures may not be comparable to other companies. Please see a historical reconciliation of these measures to the most comparable GAAP measure presented in our consolidated financial statements below.
