Security Devices International Invited to Military Workshop

WASHINGTON, DISTRICT OF COLUMBIA -- (MARKET WIRE) -- 07/12/11 -- Security Devices International ("SDI") (OTCBB: SDEV) today announced that it was extended an invitation to a 2-day workshop in Israel that was attended by top Military leaders of the Northern, Southern and Central commands of the Israeli Military, as well as top officials of Israeli Police agencies. The purpose of the exhibition was to explore military products, including less-lethal products that will assist the Israeli forces moving forward into the fall of this year in the event that anticipated protests require the intervention of Peace keeping forces.

Representatives of SDI proudly displayed the Companies Wireless Electric Projectile ("WEP40") ammunition, and the Blunt Impact Projectile ("BIP40") less-lethal ammunition. There was a vast amount of interest from both the Israeli Military and the Israeli police to continue discussions and attend a live fire demonstration in the coming weeks.

"This is an excellent opportunity for SDI to showcase our innovative lines of less-lethal ammunition products to a modern Military establishment", said Gregory Sullivan, SDI's President and CEO. "This demonstration will be one of several that SDI will be participating in this summer. The global interest in our less-lethal ammunition continues to grow as we move into the production stage, with our emerging partnerships".

About Security Devices International Inc. SDI is a less-than-lethal defense technology company, specializing in the development of innovative next generation solutions for security situations that do not require the use of lethal force. SDI is currently in the advanced stages of deploying their patent pending family of products. These products consist of; the Blunt Impact Projectile 40mm (BIP40), and the Wireless Electric Projectile 40mm (WEP40). The Market sectors for these products include; the military, army, navy, air force, peacekeeping, homeland security, and law enforcement professionals. The Company's products were designed for use in existing 40mm launchers.
