Aptose Biosciences Meets Nasdaq Minimum Bid Price Compliance

SAN DIEGO and TORONTO, June 26, 2023 (GLOBE NEWSWIRE) -- Aptose Biosciences Inc. ("Aptose" or the "Company") (NASDAQ: APTO, TSX: APS), a clinical-stage precision oncology company developing highly differentiated oral kinase inhibitors to treat hematologic malignancies, today announced that it received a written notification from the Listing Qualifications Department of The Nasdaq Stock Market, LLC ("Nasdaq") notifying the Company that it meets compliance with the Nasdaq's minimum bid price requirement.

In July 2022, Aptose received notice from Nasdaq that its common shares failed to maintain a minimum bid price to remain listed on the exchange. Aptose was allowed a cure period of 6 months, along with an additional 6-month extension period, to meet the minimum share price or greater. As a mechanism for cure and supported by shareholder approval, Aptose implemented a reverse stock split during June 2023. On June 21, 2023, Nasdaq confirmed that, for ten consecutive business days, the closing bid price of the Company's common stock has been at \$1.00 per share or greater. Accordingly, the Company meets compliance with Listing Rule 5550(a)(2), and the matter is closed.

About Aptose

Aptose Biosciences is a clinical-stage biotechnology company developing precision medicines addressing unmet medical needs in oncology, with an initial focus on hematology. The Company's small molecule cancer therapeutics pipeline includes products designed to provide single agent efficacy and to enhance the efficacy of other anti-cancer therapies and regimens without overlapping toxicities. The Company has two clinical-stage oral kinase inhibitors under development for hematologic malignancies: tuspetinib (HM43239), an oral, myeloid kinase inhibitor being studied as monotherapy and in combination therapy in the APTIVATE international Phase 1/2 expansion trial in patients with relapsed or refractory acute myeloid leukemia (AML); and luxepitinib (CG-806), an oral, dual lymphoid and myeloid kinase inhibitor in Phase 1 a/b stage development for the treatment of patients with relapsed or refractory hematologic malignancies.
