Selected Pro Forma Non-GAAP Financial Information

On December 31, 2018, the Company completed the previously announced sale of its Wood Flooring segment (the "Transaction"), as disclosed in a Current Report on Form 8-K filed by the Company with the Securities and Exchange Commission on January 7, 2019 (the "Form 8-K"). The Form 8-K included certain unaudited pro forma condensed consolidated financial information showing the pro forma effects of the Transaction as of the dates and for the periods presented and reclassifying the Wood Flooring segment as a discontinued operation. In conjunction with the Transaction, the Company also implemented a cost optimization program to better align its cost structure for the future. To assist readers in their understanding of the expected effects of the Transaction and the cost optimization program, in the following tables the Company has applied additional pro forma adjustments to the pro forma financial information included in the Form 8-K to show the estimated cost savings that would have been realized had the Transaction and the cost optimization program been completed on January 1, 2015 (the beginning of the period for which the pro forma financial information in the Form 8-K was presented). In addition, the information below provides a pro forma calculation of the Company's adjusted EBITDA for periods prior to the Company's sale of its Wood Flooring segment. Since adjusted EBITDA is a non-GAAP financial measure, a reconciliation to the most directly comparable GAAP financial measure is also set forth below. The pro forma financial information set forth below is presented for comparative purposes only and is not intended to be indicative of the balance sheet and statements of income which would have been realized had the Transaction or the cost optimization program been completed as of the date or during the periods for which the pro forma financial information is presented or for any future period or date. The pro forma financial information should be read in conjunction with the Company's historical financial statements and related notes for the periods presented, as well as the pro forma financial information included in the Form 8-K and the related notes.
