Duos Technologies Completes First Full-Scale Rail Inspection Portal (rip(R)) for CSX Transportation, Inc.

First Official Train Passing Through Portal Featured in CSX Video

JACKSONVILLE, FL / ACCESSWIRE / January 14, 2020 / [Duos Technologies Group, Inc.](#) ("Duos" or the "Company") (OTCQX:DUOT), through its operating subsidiary Duos Technologies, Inc., a provider of intelligent analytical technology solutions, has completed its most recent Rail Inspection Portal ([rip®](#)) project award, which is also the first full-scale rip® implementation for [CSX Transportation](#), Inc. (CSX).

Completed in record time, the portal was recently featured in a promotional video published by CSX, highlighting their renewed and expanded commitment to safety improvement and technological enhancements. This rip® installation and accompanying promotional effort underscore the increasing trend in the railroad industry of automating railcar mechanical inspections, which have historically been conducted manually.

Duos CEO Gianni Arcaini commented: "CSX is one of the seven Class 1 Railroad operators who own and operate a combined 140,000 miles of rail track, a significant and immediate growth opportunity for our Company. As an existing customer but a first-time buyer of our next generation rip® system, CSX has shown that they remain committed to working with cutting-edge technology providers like Duos to ensure the highest level of safety and efficiency."

Mr. Arcaini continued, "Their promotional video also effectively summarizes how the system works and illustrates how our technology automates a previously very manual process. Looking ahead, the next phase of this initial project includes the addition of artificial intelligence algorithms, which, when installed over the coming months, will mark the completion of the overall automation process."

The CSX video highlighting Duos' rip® technology can be viewed on the CSX website by clicking the following [link](#).

About Duos Technologies Group, Inc.

Duos Technologies Group, Inc.
