# Tecogen Announces Cogeneration Equipment Sale to National Medical Group's Northern California Medical Center

WALTHAM, Mass., Sept. 23, 2014 /PRNewswire/ -- Tecogen® Inc. (NASDAQ: TGEN) today announced the sale of a 225 kW cogeneration system to a one hundred eighty one bed medical and surgical hospital in northern California. The facility purchased three (3) Tecogen 75 kW combined heat and power (CHP) modules equipped with Tecogen's patented *Ultra* low emissions system.

The units will produce electricity for the hospital's on-site use, as well as heat for the heating and domestic hot water systems. The units feature Tecogen's *Ultra* low emissions technology, which meets the strictest California emissions regulations.

"Many of Tecogen's hospital clients are looking to reduce energy costs and decrease their carbon footprint," said Robert Panora, President and COO of Tecogen. "Hospitals consume large amounts of energy and cogeneration offers immediate savings as well as an environmentally sensitive solution."

Earlier this year, Tecogen sold seven (7) similar modules to a sister facility in this Medical Group's Northern California area.

**About Tecogen**
Tecogen manufactures, installs, and maintains high efficiency, ultra-clean combined heat and power products including natural gas engine-driven cogeneration, air conditioning systems, and high-efficiency water heaters for industrial and commercial use. Tecogen has shipped more than 2,000 units, supported by an established network of engineering, sales, and service personnel across the United States.
