Brazil Potash Announces Site Visit by Federal and State Government Officials and Participation in Amazonas Oil, Gas & Energy Conference

- **Site visit will be attended by government officials from the agriculture, fertilizer and mining sectors during which construction achievements along with social and environmental initiatives will be covered**
- **Brazil Potash to showcase sustainability initiatives, opportunities and lessons learned at Amazonas State government conference**

MANAUS, Brazil, March 18, 2025 (GLOBE NEWSWIRE) -- Brazil Potash Corp. ("Brazil Potash" or the "Company") (NYSE-American: GRO), a developer and builder of Brazil's largest potash fertilizer project, announced today that its wholly-owned subsidiary, Potássio do Brasil Ltda., will host Brazil federal and Amazonas state government officials at site and at the local Autazes municipality the morning of March 18, 2025. During this visit, Brazil Potash's guests will tour several socioeconomic and environmental projects supported by the Company and visit the area where the Autazes Potash Project operations will be installed.

Additionally, the Company will participate in the Amazonas Oil, Gas & Energy – Expo & Conference 2025 taking place March 18-20 at the Amazonas Convention Center – Vasco Vasques in Manaus. This event is organized by the Amazonas State Government through the State Department of Energy, Mining and Gas (SEMIG) and Sebrae Amazonas.

With the theme "Industrial, Technological and Innovation Policy for the Oil, Gas and Energy Sector of Amazonas," the Amazonas Oil, Gas & Energy Conference will bring together industry representatives, experts, and investors to discuss challenges, opportunities, and trends in the sector.

Potássio do Brasil will contribute to discussions in two prominent panels:

- **March 18: ESG TAG Arena panel on "ESG Cases & Practices in Oil, Gas and Energy Companies – Perspectives, Challenges and Lessons Learned – What is the contribution of this topic to COP 30?"**
- **March 20, 5:00 PM: Adriano Espeschit, President of Potássio do Brasil, will participate in the panel "Oil, Gas and Mining Exploration & Production in the Amazon – Opportunities and Challenges."**

The event is free and tickets can be obtained until March 18 on the conference website ([available here](#)).

Technical Visit to Autazes

Potássio do Brasil will host a technical visit to the Autazes Potash Project construction site with the following attendees: José Carlos Polidoro, advisor to the executive secretariat of the Ministry of Agriculture and Livestock (MAPA); Dionísia Campos, Federal Superintendent of Agriculture and Livestock (SFA/AM); Bernardo Silva, Executive Director of the National Union of Raw Materials Industries for Fertilizers (Sinprifert); Oziel Mineiro, Executive Secretary of Mining of Amazonas (SEMIG-AM); Sthanley Bastos, Department Head of SEMIG-AM; and Ailton Queiroz, Representative of the Conecthus Institute.

The delegation will be received and accompanied by Adriano Espeschit, President of Potássio do Brasil Ltda. "This visit represents an important opportunity to showcase our progress to key stakeholders who will play a vital role in the development of the Autazes Potash Project," emphasized Espeschit. "We look forward to highlighting both our construction advancements to date and our ongoing socioeconomic and environmental initiatives in the region."

About Brazil Potash

Brazil Potash (NYSE-American: GRO) (www.brazilpotash.com) is developing Brazil's largest potash project to supply sustainable fertilizers to one of the world's largest agricultural exporters. Brazil is critical for global food security as the country has amongst the highest amounts of fresh water, arable land, and an ideal climate for year-round crop growth, but it is vulnerable as it imported over 95% of its potash fertilizer in 2021, despite having what is anticipated to be one of the world's largest undeveloped potash basins in its own backyard. The potash produced will be transported primarily using low-cost river barges on an inland river system in partnership with Amaggi (www.amaggi.com.br), one of the Brazil's largest farmers and logistical operators of agricultural products. With an initial planned annual potash production of up to 2.4 million tons per year, Brazil Potash's management believes it could potentially supply approximately 20% of the current potash demand in Brazil. Management anticipates 100% of Brazil Potash's production will be sold domestically to reduce Brazil's reliance on potash imports while concurrently mitigating approximately 1.4 million tons per year of GHG emissions.
