NASDAQ: EQIX

Public Disclosure Statement

Forward-Looking Statements

Except for historical information, this presentation contains forward-looking statements which include words such as "believe," "anticipate," and "expect." These forward-looking statements involve risks and uncertainties that may cause Equinix's actual results to differ materially from the expectations discussed in such forward-looking statements. Factors that might cause such differences include, but are not limited to, risks to our business and operating results related to the current inflationary environment; foreign currency exchange rate fluctuations; stock price fluctuations; increased costs to procure power and the general volatility in the global energy market; the challenges of building, and operating, IBX and xScale data centers, including related to sourcing suitable power and land, and any supply chain constraints or increased costs of supplies; the challenges of developing, deploying and delivering Equinix products and solutions; unanticipated costs or difficulties relating to the integration of companies we have acquired or will acquire into Equinix; a failure to receive significant revenues from customers in recently built out or acquired data centers; failure to complete any financing arrangements contemplated from time to time; competition from existing and new competitors; the ability to generate sufficient cash flow or otherwise obtain funds to repay new or outstanding indebtedness; the loss or decline in business from our key customers; risks related to our taxation as a REIT; risks related to regulatory inquiries or litigation and other risks described from time to time in Equinix filings with the Securities and Exchange Commission. Refer to our annual report on Form 10-K filed with the SEC on February 12, 2025 and our most recent quarterly report on Form 10-Q. In addition, Equinix does not assume any obligation to update the forward-looking information contained in this presentation.

Definitions

Funds from Operations (FFO): Represents net income attributable to common stockholders excluding:

- · gain or loss from the disposition of real estate assets
- · depreciation and amortization on real estate assets
- · adjustments for unconsolidated joint ventures' and non-controlling interests' share of these items

Adjusted Funds from Operations (AFFO): Represents FFO adjusted for:

- · depreciation and amortization expense on non-real estate assets
- · accretion expense
- stock-based compensation expense
- stock-based charitable contributions
- restructuring charges
- impairment charges
- · transaction costs
- an adjustment to remove the impacts of straight-lining installation revenue
- an adjustment to remove the impacts of straight-lining rent expense
- an adjustment to remove the impacts of straight-lining contract costs
- · amortization of deferred financing costs and debt discounts and premiums
- gain or loss from the disposition of non-real estate assets
- gain or loss on debt extinguishment
- an income tax expense adjustment
- recurring capital expenditures
- · net income or loss from discontinued operations, net of tax
- · adjustments from FFO to AFFO for unconsolidated joint ventures' and non-controlling interests' share of these items

Annualized Gross Bookings: Represents the annualized revenue impact of stated Monthly Recurring Revenue (MRR) on newly executed contracts with a term of 12 months or more, net of any MRR decreases from cancellations or terminations associated with the new contracts and adjusted for the impact of pricing changes on existing contracts. This measure excludes contracts for recurring revenue from our joint ventures and the impact of power price adjustments. This measure only includes contracts that we anticipate will start generating revenue within 90 days.

Monthly Recurring Revenues (MRR): Total quarterly or annual revenues excluding non-recurring revenues divided by 3 or 12, respectively.

Normalized and Constant Currency: Equinix provides normalized and constant currency growth rates for revenues, adjusted EBITDA, AFFO and AFFO per share. These growth rates assume foreign currency rates remain consistent across comparative periods. Revenue growth rates exclude the impact of net power pass-through, acquisitions, divestitures, and the Equinix Metal wind-down. Adjusted EBITDA growth rates exclude the impact of acquisitions, divestitures, and integration costs. AFFO growth rates exclude the impact of acquisitions and related financing costs, divestitures, integration costs and balance sheet remeasurements.

Monthly Recurring Revenue per Cabinet (MRR per cab): (current quarter recurring revenues / 3) divided by ((quarter end cabinets billing prior quarter + quarter end cabinets billing current quarter) / 2). Excludes xScale JV recurring revenues (Global), Infomart non-IBX tenant income and Equinix Metal (AMER), MainOne acquisition (EMEA), and TIM acquisition (APAC).

Virtual connections: The number of private connections between customers over the Equinix Fabric platform.

Data Center Growth

New Data Centers: Phase 1 began operating on or after January 1, 2024.

Expansion Data Centers: Phase 1 began operating before January 1, 2024, and there is an expected expansion of one or more additional phases leveraging the existing capital infrastructure, or a redevelopment of a previous phase. This also includes data centers where a new phase or redevelopment has opened for a previously stabilized data center on or after January 1, 2024.

Stabilized Data Centers: The final expansion or redevelopment phase began operating before January 1, 2024.

Adjusted Net Operating Income (NOI) Composition: Adjusted NOI is calculated by taking recurring revenues, deducting recurring cash cost of revenues, adding back operating lease rent expense and deducting cash SG&A allocated to the properties. The impact of operating lease rent expense is removed to reflect an owned income stream. Total cash rent is provided in the components of NAV. Regional SG&A expense is allocated to the properties to reflect the full sales, marketing and operating costs of owning a portfolio of retail colocation properties. Corporate SG&A is provided to show centralized organization costs that are not property-related and, therefore, excluded from adjusted NOI.

Corporate Cash SG&A: Centralized organization costs that are not property-related and, therefore, excluded from adjusted NOI.

Components of Net Asset Value (NAV): A detailed disclosure of applicable cash flows, assets and liabilities to support a NAV. Net asset valuation involves a market-based valuation of assets and liabilities to derive an intrinsic value of equity. Operating cash flows are separated into real estate income (adjusted NOI), non-recurring income and other operating income in order to facilitate discrete composition valuations. New properties and CIP generating unstabilized cash flows are reflected based on gross asset value. Other assets and liabilities include only tangible items with realizable economic value. Balance sheet assets and liabilities without tangible economic value (i.e. goodwill) are excluded. Other ongoing expenses including cash rent and cash tax expenses are disclosed to facilitate a market valuation of those liabilities. Share count is provided on a fully-dilutive basis including equity awards.

Capital Expenditures

Recurring Capital Expenditures: Capital spending incurred to extend useful life of IBXs or other Equinix assets that are required to support current revenues.

- Sustaining IT & Network: Capital spending necessary to extend useful life of IT & Network infrastructure assets required to support existing products and business & operations services. This includes hardware & network gear as well as development enhancements that extend useful life of system assets.
- IBX Maintenance: Capital spending that extends useful life of existing IBX data center infrastructure; required to support existing operations.
- Re-Configuration Installation: Capital spending to support second generation configuration of customer installations; these expenditures extend useful life of existing assets or add new fixed assets. This includes changes to cage build-outs, cabinets, power, network gear and security component installations.

Non-Recurring Capital Expenditures: Primarily for development and build-out of new IBX capacity as well as redevelopment of select IBXs that are near the end of their useful lives. Also includes discretionary expenditures for expansions, transformations, incremental improvements to the operating portfolio (e.g. electrical, mechanical and building upgrades), IT systems, network gear or corporate offices which may expand the revenues base and increase efficiency.

- IBX Expansion: Capital spending for new IBX data centers construction, data center expansion phase construction or increased capacity enhancements.
- IBX Redevelopment: Capital spending in select IBXs to enhance the revenue capacity, efficiency and/or operating standards of IBXs data centers that are near the end of their useful life.
- Product, IT, Network and Corporate Real Estate (CRE): Capital spending related to discretionary IT transformation projects, corporate real estate, Product and Network that primarily expand revenues or increase margins.
- Initial / Custom Installation: Capital spending to support first generation build-out for customer installations; this includes cage configuration, cabinet, power, network gear and security enhancements. This also includes custom installations and flex space installations.
