Ekso Bionics Teams Up with Performance Contracting, Inc. for Innovative Testing Approach of EVO™ Technology

RICHMOND, Calif., March 03, 2021 (GLOBE NEWSWIRE) -- Ekso Bionics Holdings, Inc. (Nasdaq: EKSO) (the "Company"), an industry leader in exoskeleton technology for medical and industrial use, today announced that Performance Contracting, Inc. ("PCI"), a leading U.S. specialty contractor, is the latest company in the construction vertical to implement field testing of EVO™ exoskeleton vests. Over the course of a year, PCI employees in six Bay Area counties have committed to testing EVO™ exoskeleton vests for the Company's continued product development and innovation.

"We are excited that PCI's workforce will benefit from our novel EVO technology," commented Michael Pratt, Vice President of Ekso Bionics. "Companies within the construction vertical are starting to recognize that EVO provides meaningful support for workers when performing routine and labor-intensive tasks. We look forward to supporting our growing user base, including PCI, with our unique solution and driving increased adoption with our flexible subscription-based offering."

EVO is the world's most durable, naturally-tracking, and assistive exoskeleton vest. The exoskeleton offers unique benefits in the construction industry that aids workers when performing strenuous tasks in order to reduce fatigue and worker-related injuries while increasing productivity.

"Putting our people first has always been a key differentiator at PCI," said David Link, Regional Manager, Bay Area of PCI. "With our team of over 6,300 skilled craft workers across the United States, it is imperative for us to invest in both their well-being and productivity to remain an industry leader. Ekso's EVO aligns with our most important core value of safety and supports our performance-driven culture. We are eager to explore this technology in the field with the goal of helping our employees achieve their fullest potential."

About Ekso Bionics®

Ekso Bionics® is a leading developer of exoskeleton solutions that amplify human potential by supporting or enhancing strength, endurance and mobility across medical and industrial applications. Founded in 2005, the Company continues to build upon its industry-leading expertise to design some of the most cutting-edge, innovative wearable robots available on the market. Ekso Bionics is the only exoskeleton company to offer technologies that range from helping those with paralysis to stand up and walk, to enhancing human capabilities on job sites across the globe. The Company is headquartered in the San Francisco Bay Area and is listed on the Nasdaq Capital Market under the symbol "EKSO." Forward-Looking Statements

Any statements contained in this press release that do not describe historical facts may constitute forward-looking statements. Forward-looking statements may include, without limitation, statements regarding the potential benefits, performance, durability and effectiveness of the Company’s products and systems, including EVO, or their impact on productivity or fatigue reduction, and the assumptions underlying such statements. Such forward-looking statements are not meant to predict or guarantee actual results, performance, events or circumstances and may not be realized because they are based upon the Company’s current projections, plans, objectives, beliefs, expectations, estimates and assumptions and are subject to a number of risks and uncertainties and other influences, many of which the Company has no control over. Actual results and the timing of certain events and circumstances may differ materially from those described by the forward-looking statements as a result of these risks and uncertainties. Factors that may influence or contribute to the inaccuracy of the forward-looking statements or cause actual results to differ materially from expected or desired results may include, without limitation, the ongoing COVID-19 pandemic and its impact on the Company’s financial condition and business, the highly competitive markets in which the Company’s products are sold, the new and unproven nature of the market for the Company’s products, the long and variable sales cycles for the Company’s products, the factors outside the Company’s control that affect the international sales of its products, the costs related to and impacts of potential failure of the Company to obtain or maintain protection for the Company’s intellectual property rights, the failure of the Company to obtain or maintain regulatory approval to market the Company’s medical devices, and risks related to product liability, recall and warranty claims. These and other factors are identified and described in more detail in the Company’s filings with the U.S. Securities and Exchange Commission. To learn more about Ekso Bionics please visit the Company’s website at www.eksobionics.com or follow @EksoBionics on Twitter. The Company does not undertake to update these forward-looking statements.
