# Actinium to Present at the LD Micro Conference in Los Angeles December 3rd 2014

## Executive Chairman to Provide an Update on Recent Milestones

NEW YORK, NY -- (Marketwired) -- 11/20/14 -- Actinium Pharmaceuticals, Inc. (NYSE MKT: ATNM) ("Actinium" or "the Company"), a biopharmaceutical company developing innovative targeted payload immunotherapeutics for the treatment of advanced cancers, today announced that Sandesh Seth, Executive Chairman of Actinium, will present at the LD Micro Conference on Wednesday, December 3<sup>rd</sup>, 2014 at 3:30 p.m. PT in Los Angeles, CA.

The Company's presentation is scheduled to begin at 3:30 p.m. PT and will be available via a live webcast. To access the live audio webcast, please log on through a link located in the Investors section of Actinium's website at [www.actiniumpharma.com](http://www.actiniumpharma.com) under the Events tab. A replay will be available on the Actinium website within 48 hours and will be archived for a limited time.

Mr. Seth and other members of the management team will be available for one-on-one meetings at the conference. Members of the investment community who are interested in meeting with management should contact Evan Smith, CFA of Actinium Pharmaceuticals, at (646) 840-5442 or [esmith@actiniumpharma.com](mailto:esmith@actiniumpharma.com).

### ***About Actinium Pharmaceuticals***

Actinium Pharmaceuticals, Inc. ([www.actiniumpharma.com](http://www.actiniumpharma.com)) is a New York-based biopharmaceutical company developing innovative targeted payload immunotherapeutics for the treatment of advanced cancers. Actinium's targeted radiotherapy products are based on its proprietary delivery platform for the therapeutic utilization of alpha-emitting actinium-225 and bismuth-213 and certain beta emitting radiopharmaceuticals in conjunction with monoclonal antibodies. The Company's lead radiopharmaceutical product candidate lomab-B is designed to be used, upon approval, in preparing patients for hematopoietic stem cell transplant, commonly referred to as bone marrow transplant. The Company plans to conduct a single, pivotal, multicenter Phase 3 clinical study of lomab-B in refractory and relapsed AML patients over the age of 55 with a primary endpoint of durable complete remission. The Company's second product candidate, Actimab-A, is continuing its clinical development in a Phase 1/2 trial for newly diagnosed AML patients over the age of 60 in a single-arm multicenter trial.

### ***Forward-Looking Statement for Actinium Pharmaceuticals, Inc.***

This news release contains "forward-looking statements" as defined in the Private Securities

Litigation Reform Act of 1995. These statements are based on management's current expectations and involve risks and uncertainties, which may cause actual results to differ materially from those set forth in such statements. The forward-looking statements may include statements regarding product development, product potential or financial performance. No forward-looking statement can be guaranteed and actual results may differ materially from those projected. Actinium undertakes no obligation to publicly update any forward-looking statement, whether as a result of new information, future events or otherwise.
