

I. Policy on Animal Testing

Herbalife Nutrition does not test products on animals, except to satisfy legal obligations and regulatory bodies. In the instances where animal testing is required, Herbalife Nutrition uses qualified third-party laboratories following internationally accepted protocols and to the minimum extent required, applying the principles of the 3Rs (Replace, Reduce and Refine).

We are committed to exploring alternatives to animal testing methods and encourage our suppliers to use alternative methods whenever feasible. We are working with leading organizations to develop and validate alternative testing models with the goal to eliminate the need for animal testing in food and cosmetic products in the future.
