- First quarter adjusted EPS increased 44.1 percent to \$0.98 compared to the prior year period.¹
- Raises FY'10 EPS guidance range to a range of \$3.80 to \$3.90 on higher volume point and net sales growth.
- Company announces expansion of the current share repurchase authorization to \$1 billion through 2014.

LOS ANGELES--(BUSINESS WIRE)-- Herbalife Ltd. (NYSE:HLF) today reported first quarter net sales increased 18.6 percent to \$618.6 million and local currency net sales increased 13.3 percent compared to the same period in 2009. The record revenue reflects volume point growth of 6.2 percent and an increase in Average Active Sales Leaders of 7.4 percent, both compared to the first quarter of 2009. First quarter adjusted net income was \$61.5 million, or \$0.98 in adjusted diluted earnings per share, reflecting an increase of 46.7 percent and 44.1 percent, respectively, compared to the same period in 2009. The 2010 first quarter adjusted results exclude a \$9.7 million negative impact to net income, or \$0.15 net charge to EPS due to the implementation of highly-inflationary accounting in Venezuela.

For the quarter ended March 31, 2010, the company reported net income of \$51.9 million, or \$0.83 per diluted share compared to \$41.5 million or \$0.67 per diluted share in the first quarter of 2009, primarily reflecting the contribution margin from higher volume combined with currency benefits and a lower effective tax rate partially offset by the impact of the implementation of highly-inflationary accounting in Venezuela noted above.

For the three months ended March 31, 2010, the company generated cash flow from operations of \$87.4 million, paid dividends of \$12.1 million, invested \$11.6 million in capital expenditures and repurchased \$28.0 million in common stock. The company's net debt balance at the end of the first quarter was \$82.1 million, reflecting an improvement of \$17.4 million from December 31, 2009.

The first quarter operating margin of 10.3 percent was negatively impacted by 390 basis points from one-time items associated with the implementation of highly-inflationary accounting in Venezuela. Excluding this impact, adjusted operating income margin was 14.2 percent, a 210bps improvement from the prior year's adjusted operating margin.

"Our Distributors ongoing success using daily consumption business models is fueling the company's momentum and driving continued growth," said Chairman and Chief Executive Officer Michael O. Johnson. "They are in the early innings of the global expansion of these business models, which have the potential to reach dramatically deeper into the marketplace and attract more consumers."

Business Highlights²

For the quarter, volume points from emerging markets² represented 50% of total company Volume Points. In terms of local currency net sales, emerging market countries increased 13.9 percent compared to the prior year period. This growth was driven by increases in India, China, Mexico, Brazil and Venezuela which were partially offset by a decline in Taiwan resulting from the one-time benefit in the first quarter of 2009 driven by the government stimulus coupon program.

Established markets experienced 12.8 percent local currency net sales growth in the quarter compared to the prior year period. The growth in established markets was driven by continued strength in Korea and the U.S.

During the first quarter the company hosted its South American Extravaganza in Quito, Ecuador and celebrated its 30th anniversary at its Leadership Summit in Orlando, Florida where we collectively hosted approximately 16,000 distributors.

Share Repurchase Program Update

The company's Board of Directors today authorized a \$700 million expansion to the existing \$300 million share repurchase authorization program bringing the total amount of Herbalife stock which the company may repurchase up to \$1 billion over a five year period expiring on December 31, 2014. The company has utilized approximately \$100 million already, bringing the total remaining under the combined authorization to approximately \$900 million.

John DeSimone, the company's Chief Financial Officer, said, "We have a unique business model which continues to generate significant and consistent free cash flow. This additional authorization speaks to our Board's belief that Herbalife shares remain under-appreciated and under-valued in the marketplace and the company's commitment to utilize a meaningful portion of our excess free cash flow to return value to investors." Since 2007, the company has returned \$600 million to shareholders through the repurchase of 16 million shares.

Herbalife's share repurchases, if any, may take place from time to time at management's

discretion based on market conditions, and shares may be purchased in open-market, privately negotiated or other transactions.
