(8) Based on interim income tax reporting rules, these expenses are not considered discrete items. As a result, the company's full year effective tax rate is impacted by these items. When applying the full year effective tax rate to year-to-date income, the company's year-to-date tax provision recorded with respect to these non-GAAP adjustments is different from the forecasted full-year tax provision impact of these items. As a consequence, adjustments to the year-to-date and quarterly tax impacts will be recorded as the adjusted full year effective tax rate is applied to income in subsequent periods. Additionally, adjustments to items unrelated to these non-GAAP adjustments may have an effect on the income tax impact of these non-GAAP adjustments in subsequent periods. The company plans to update the income tax impact of these items in subsequent interim reporting periods.
