# Aeluma Announces Launch of New Corporate Website

**GOLETA, CA / ACCESSWIRE / March 7, 2023** /[Aeluma, Inc.](https://www.aeluma.com) (the "Company") (OTCQB:ALMU), a semiconductor company specializing in scalable, cost-effective technologies for LiDAR (light detection and ranging), communication, and sensing, is proud to announce the launch of its new, redesigned corporate website at <https://www.aeluma.com>.

The new website provides visitors, including industry professionals, investors, and shareholders, with an effective and robust way to learn about the Company, its technology, and its products. The site will be continually updating content with corporate announcements, media, events, investor presentations, and SEC filings.

With its proprietary technology that combines compound semiconductor nanomaterials with mass market silicon manufacturing, Aeluma is developing products that could offer high performance, low cost solutions for emerging markets such as automotive LiDAR, communication, mobile, AR/VR, quantum computing and AI. Key to Aeluma's disruptive technology is the ability to manufacture its semiconductor chips on large-diameter substrates, which can scale and be mass produced, thereby potentially reducing the cost of sensor chips dramatically.

## About Aeluma, Inc.

Aeluma ([www.aeluma.com](https://www.aeluma.com)) develops novel optoelectronic devices for sensing and communications applications. Aeluma has pioneered a technique to manufacture devices using high performance compound semiconductor materials on large-diameter silicon wafers that are commonly used for mass market microelectronics. The technology has the potential to enhance performance and provide a path to cost-effective, large-scale manufacturing, both of which are critical for future LiDAR and other sensor applications. Aeluma is developing a streamlined business model from its headquarters in Goleta, CA that has a state-of-the-art manufacturing cleanroom.

## Forward-Looking Statements

All statements in this press release that are not historical are forward-looking statements, including, among other things, statements relating to the Company's expectations regarding its market position and market opportunity, expectations and plans as to its product development, manufacturing and sales, and relations with its partners and investors. These statements are not historical facts but rather are based on the Company's current expectations, estimates, and projections regarding its business, operations and other similar or related factors. Words such as "may," "will," "could," "would," "should," "anticipate," "predict," "potential," "continue," "expect," "intend," "plan," "project," "believe," "estimate,"

and other similar or related expressions are used to identify these forward-looking statements, although not all forward-looking statements contain these words. You should not place undue reliance on forward-looking statements because they involve known and unknown risks, uncertainties, and assumptions that are difficult or impossible to predict and, in some cases, beyond the Company's control. Actual results may differ materially from those in the forward-looking statements as a result of a number of factors, including those described in the Company's filings with the Securities and Exchange Commission. The Company undertakes no obligation to revise or update information in this release to reflect events or circumstances in the future, even if new information becomes available.
